## SAUNATONTTU

### TOWARD PERFECTION

Helo and renowned designer Ristomatti Ratia decided to develop the perfect sauna heater. The sleek black result was called the Helo Saunatonnttu. This multi-patented innovation with a great European design is hailed by many as unquestionably the world's best sauna heater.

The Saunatonnttu secret is the 100 kg mass of stones that are very well insulated to store constant heat for long periods. The stones release soft, abundant and rich steam when a ladle of water is thrown on them. This heat storage means the Saunatonnttu can be instantly ready for you at any time.

The small safety distances required bring flexibility to sauna interior design, and the heater can be easily integrated into a raised floor. The Saunatonnttu has a small handy controller for all heater parameters.

The Saunatonnttu is 500 mm in diameter and 1090 mm high.

TYPE	POWER (kW)	SAUNA SIZE (m <sup>3</sup> )	MINIMUM DISTANCES (mm) side / front* / ceiling
SAUNATONTTU 3	3.4	3.0-8.0	30 / 30 / 800
SAUNATONTTU 4	4.8	5.0-11.0	30 / 30 / 800
SAUNATONTTU 6	6.4	7.0-14.0	30 / 30 / 800
SAUNATONTTU 8	8.0	9.0-17.0	30 / 30 / 800

\*5 mm minimum distance up to 750 mm from floor
