

- Unique Kastor sauna stove, which renews the entire sauna fixtures.
- A unique design in which the stone magazine follows the shape of the hearth, which results in superior heating of the stones.
- An impressive quantity of stones, 150/200 kg, distributes the heat uniformly and this provides a gentle and humid sauna.
- A stable and durable Kastor design, combined with Finnish steel of the highest quality as well as solid professional expertise.
- Made in Finland.
- 3-year material guarantee.

\* Non-stock item

The sauna stove has two adjustable legs. The safe distance as given in the table is the distance from the stove to flammable material. To non-flammable material, the distance should be at least 50 mm.

#### Choose a stove of the right size from our versatile assortment

A visible brick or glass surface increases cubic volume. The compensation for brick walls is calculated by adding 3 cubic metres for every square meter brick wall or single glass wall that exceeds 2 square meters. If the sauna has timber walls without insulation, the volume is increased by 25%. Always choose the larger model of sauna stove in borderline cases.

#### Choose the right size stones for your sauna stove

The diameter of the stones in a wood-burning sauna stove must be at least 10 cm.

#### 3-year material guarantee.

Following the merger of the two leading companies, Tylö and Helo, the TyloHelo World Group is the world's largest company in the sauna and steam bath sector, supplying the strongest brands on the market: Tylö, Helo, Kastor, Finnleo and Amerec.
