## HELO HIMALAYA

### TAKING THE SAUNA TO NEW HEIGHTS

Himalaya - the name of the legendary mountain range means "home of the snow". Like its namesake, the secret of Helo's Himalaya also lies in the natural water cycle. The new sauna heater conceals a water container featuring ingenious BWT technology, which humidifies the sauna cabin while the heater is warming the room. So when you climb up onto the benches, the air is already pleasantly humid and you can feel the rich warmth on your skin.

With Himalaya, even milder sauna temperatures of just 65-70 degrees Celsius are highly enjoyable and relaxing. Children enjoy it, too. And if you want, you can increase the sauna temperature - or simply throw water on the sauna stones for more warmth. One hundred kilograms of rock react immediately to your command.

The attractive stove is 103 cm high with a width of 33 cm and comes in matte black or chrome. The Himalaya can be installed on the floor next to a wall. Alternatively, you can integrate the heater into the benches using a glass, soapstone or steel fitting collar. The steel collar is available in chrome or matte black to match the colour of the heater.

Himalaya heaters are meant for sauna cabins measuring 5-15 m<sup>3</sup>. Helo Himalaya is digitally controlled using Midi controller. Midi control unit can be installed inside the sauna room.

You can also add aromatic sauna scents into the water container or put some salt on top of it. Put a little variation into your sauna experience.

MODEL	POWER (kW)	SAUNA SIZE (m <sup>3</sup> )	MINIMUM DISTANCES (mm) ceiling / sides
HELO HIMALAYA 701 DE	6.8	5.0 - 9.0	880 / 60
HELO HIMALAYA 901 DE	9.0	8.0 - 13.0	880 / 60
HELO HIMALAYA 1051 DE	10.5	9.0 - 15.0	880 / 60

WIDTH (mm)	HEIGHT (mm)	DEPTH (mm)
330	1030	330
