

Combi with new control panel.

Take a steam sauna in style.

You can enjoy a relaxing steam sauna in Tylö's sauna room with Tylö's Combi sauna heater. A new version of the Combi Compact h1 with 3 kW effect is also available. Everything is consistent with today's Combi Compact except from the effect. This heater now comes with the new, sleek h-control panel, which has touch control for your convenience. The h2 control panel is already prepared for a temperature and humidity sensor which will be available in the future. Mount the control panel on a wall inside or outside your sauna room.
