

Memory loss is not a normal part of aging, it is a sign of disease

Alzheimer's disease and other dementias **are not a part of normal aging**.¹ Alzheimer's disease is by far the **most common cause of dementia**.²

Alzheimer's disease accounts for **60% to 80%** of dementia cases.²

An estimated 5.5 million

Americans **ages 65 and older** were **living with Alzheimer's disease** in 2018.³

By **2050**, the number of people ages 65 and older with Alzheimer's disease **may grow from 5.5 million to a projected 13.8 million**.³

Each person who works in a Long-Term Care organization **can dramatically shape the daily lives** of people with dementia.⁷

47.8% of **nursing home residents** were **diagnosed** with **Alzheimer's disease** or other dementias in 2016.⁵

A new case of Alzheimer's occurs every 65 seconds.³

The estimated **lifetime cost of care for an individual with dementia is \$341,840**. The U.S. spend projection for the future is more than \$1.1 trillion by 2050.⁴

Research suggests

that listening to or **singing songs can provide** emotional and behavioral **benefits for people** with Alzheimer's disease and other types of dementia.⁶

Music can:

- Relieve stress
- Ease anxiety and depression
- Reduce agitation

Arjo's Wellness Nordic Relax Chair is a refreshing approach to wellness for our senior population and may just be the solution you are looking for — [click here](#) and take a look!
