Optimize Cloud and Mobile License Allocation while Reducing Storage Costs with GSX

Configurable spot-check reports based on conditions and filters assure smooth management of on-premises and cloud collaborative deployments

BOSTON — Sept. 9, 2015 — GSX Solutions [www.gsx.com], the global leader in proactive, consolidated monitoring and reporting of enterprise collaboration environments, including Microsoft Exchange, Microsoft SharePoint, Microsoft Lync, BlackBerry Enterprise Server (BES), and IBM Applications, today announced the availability of new, conditional spot-check reports to better manage cloud and mobile deployments. IT administrators can be alerted and set reports based on several conditions and filters to improve security, resource allocation, and mobile synchronization; and optimize the storage of on-premises and cloud collaborative deployments.

This new capability allows administrators to:

· Keep an eye on top consumers who can impact performance or storage based on mailbox size, number of items, last contact dates, or the number of devices accessing mailboxes;

· Better manage mailbox allocation and identify inactive, deprecated mailboxes, both on-premises and online;

· Pinpoint devices which are non-compliant with company policies;

· Prevent any new or existing devices from accessing the company network with non-compliant policies;

· Manage mobile compliance and policies using reports about devices being wiped, IT policy status, installed applications, OS and platform versions, and more.

"Our conditional spot-check report facility puts a powerful, new, custom report-builder into the hands of IT administrators," said Antoine Leboyer, CEO of GSX. "With it, they can provide pinpoint

monitoring of issues impacting their particular environments, enhance efficiency, and lower TCO, while increasing security and compliance of their infrastructure in the cloud."

The new conditional spot-check reports are now available

The new GSX Monitor & Analyzer with conditional spot-check reports are available at http://www.gsx.com, where information on other GSX solutions and partner opportunities can also be found.

About GSX Solutions
