

# Your must-have Office 365 toolbox

## Office 365

## Cut administration costs, get higher ROI

When you move to Office 365, the business-critical part of your infrastructure is outsourced from the rest of your IT. With additional indicators to be tracked, managing the entire infrastructure becomes challenging. You need to ensure that your resources are being optimized, that your Cloud environment is secure, and that you're delivering optimal service to the business lines to guarantee end-user satisfaction.

To help administrators shift to Office 365, we offer powerful Office 365 management tools including enterprise-class administration, advanced usage reporting, simplified security audit, and end-to-end performance monitoring.

# End-to-End Performance Monitoring

*GSX Gizmo provides true end-to-end Office 365 monitoring to guarantee end-user service performance.*

- ▶ Deploy in minutes - totally agentless;
- ▶ No PowerShell skills required;
- ▶ Monitor every part of the infrastructure between the users and the Office 365 services;
- ▶ End-user monitoring from multiple critical locations;
- ▶ Monitor and report on full cloud or hybrid infrastructures;
- ▶ Proactive alerting and troubleshooting to ensure end-user satisfaction;
- ▶ Easily extend monitoring capabilities to track and troubleshoot all components that might impact applications performance including network, identity management, security, database, load balancer, and operating system.

## Advanced Usage Reporting

*GSX 365 Usage enables you to provide on-demand reporting, as well as end-user adoption and ROI calculation services.*

- ▶ SaaS designed product;
- ▶ No PowerShell skills required - user friendly interface;
- ▶ Over 90 customizable reports;
- ▶ Save money by identifying unused licenses and analyze how your Office 365 services are being used;
- ▶ Identify trends and measure user adoption of your cloud services;
- ▶ Easily monitor compliance with organizational policies and identify security risks.

## User and License Administration

*GSX 365 Enterprise Management provides all-in-one enterprise class administration.*

- ▶ Multitenant and SaaS designed product;
- ▶ No PowerShell skills required — user friendly interface that automates every possible action;
- ▶ Drastically reduce your Office 365 administration costs;
- ▶ Track and audit every change in order to prevent and fix manual errors;
- ▶ Delegate actions and processes to your team;
- ▶ Manage pure cloud as well as hybrid configuration from the same interface.

## Simplified Security Audit

*GSX 365 Security Audit simplifies the auditing of Office 365 and allows for fast security incident responses to minimize risks.*

- ▶ SaaS designed product;
- ▶ Save time when investigating an incident with rich visualizations and event timelines;
- ▶ Access to a year of tracking records by default;
- ▶ Control your data integrity with granular security settings & permissions management;
- ▶ Proactively detect suspicious user activities to identify external attacks on your environment, such as user credential leaks.
