

Employee Portal

An interactive, self-service hub for your employees.

Organizations with engaged employees outperform competitors by over 200%.

— SPRINGWORKS.COM

Data is the heart of every business. It guides decision-making, keeps teams on track, and fosters innovation. But although data is stored in mission-critical business systems, not everyone can access it. How can companies cost-effectively share data meaningfully across all lines of business?

Turn SAP Business One Data Into Aha Moments!

Employee Portal by Vision33 enables any company to create custom, self-service, interactive web portals for their employees.

Employee Portal's native integration with SAP Business One empowers companies to maximize their ERP investment by enabling staff to access and interact with its mission-critical data without paying for a costly full-use license.

With this secure, flexible, browser-based solution, your staff can:

View and interact with mission-critical business data via private and secure visual dashboards and flexible reports

Perform common sales operations, such as creating opportunities, submitting orders, and securing delivery signatures

Empower Employees With Endless Self-Service Possibilities

Because Vision33's Employee Portal is an add-on solution for SAP Business One, it's configured within Business One, enabling you to seamlessly deliver a rich, valuable, and unique experience to every employee.

Employee Portal is mobile-friendly and accessible via a standard web browser. The Portal displays SAP Business One data in real-time via configurable reports, while common transactions like placing sales orders are readily accessible via the menu.

Employee Portal will help you:

Boost productivity

Giving staff full, on-demand access to the data they need enables them to move business forward without obstacles or delays.

Make data-driven decisions

Build insightful reports that support decision-making efforts.

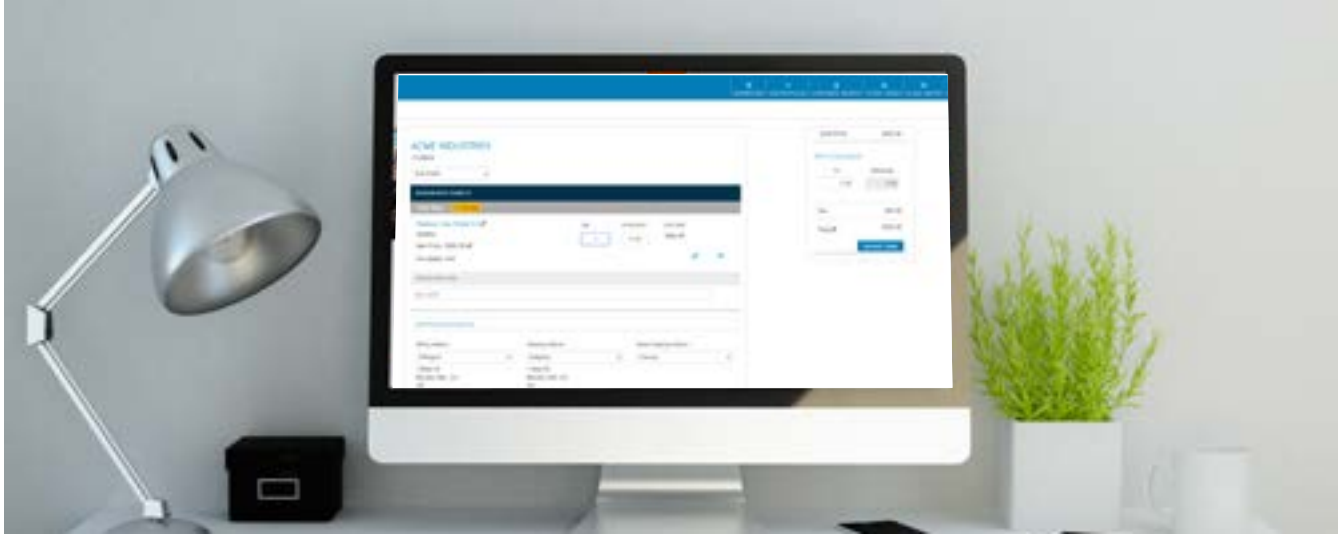

Discover unexpected insights

Data exploration can reveal unexpected insights, enhance the context of existing ideas, or lead your business in new directions.

Increase the value of your ERP

A single monthly subscription gives your entire team access to ERP data.

With Employee Portal, you can:

Deliver 24/7 self-service access

Empower teams to access reports and perform business transactions anytime, anywhere. Real-time integration with SAP Business One ensures your staff has the most current data.

Empower sales when they're on the go

Execute sales transactions via the web:

- Submit new orders and enter leads
- Generate quotes
- Maintain pipeline
- Manage sales opportunities, tasks, activities, attachments, and meetings

Build bespoke role-based dashboards and reports for each department

Put critical ERP information at your teams' fingertips with custom dashboards and reports. Reports can be shared via email, downloaded, or printed and formatted as pivot tables, charts, and grids.

Operate in multiple markets

The Portal's interface can display in any left-to-right (LTR) language. Currency and date formats are displayed in users' locales.

Reflect your brand

Create portals that reflect your business by showcasing your corporate brand colors and logo.

Control user access and security settings

Configure each user's login settings to control which portals and role-based views they can access. Streamline access via integration with OKTA for single-sign-on (SSO) capabilities.

Advanced security settings such as password rules, expiration, lock out, and re-use restrictions keep account information safe.

Expect secure and reliable performance

Employee Portal is hosted on Amazon Web Services (AWS), ensuring reliable performance and scalability as your business needs change.

Cost-effectively empower your teams to drive business forward.

*Self-service reporting
democratizes
analytics and
enables the whole
organization to
make data-driven
decisions without
the support of the
tech team.”*
