

SAP Business One for Manufacturing

SAP Business One is an integrated Enterprise Resource Planning (ERP) application with an integrated Manufacturing Resource Planning (MRP) component proven to help manufacturing companies grow fast, run simple, and drive profit. This comprehensive manufacturing solution includes effective scheduling, capacity planning and operational features to ensure that your business is getting a good return on both your time and monetary investments.

Features

- Opportunity management
- Advanced inventory management
- Project-based purchasing
- Comprehensive project management
- Partner updates & news
- Real-time, cross-functional reporting
- Time and materials management with a built in MRP system
- Process-oriented bill of materials
- Customized reports and dashboards
- Centralized sales order entry
- Change order management
- Customized quality controls
- Efficient production management with planning and scheduling tools

Benefits

- Stay on-time and on-schedule by reducing lead times and optimizing processes.
- Reduce pre-production time by improving planning, communication and responsiveness.
- Provide accurate and detailed quotes to effectively manage your employees, resources and materials.
- Increase machine and labor utilization rates by improving efficiencies and lowering the number of indirect labor hours.
- Record work in real-time and reduce lead times.
- Adapt quickly to change orders with data sharing to ensure your projects remain on schedule.
- Increase customer satisfaction with advanced quality controls to ensure your customers are getting the highest quality products from your company.

SAP Business One is an all-in-one ERP solution that allows manufacturing companies to run simple with a full, 360 degree view of business operations. From financials and accounting to inventory and production management, all of your key manufacturing business areas are integrated to provide clear visibility into your entire business.
