The Challenge

Before SAP Business One, Kenmore Label & Tag used Sage BusinessWorks to manage its operations. But more customers led to more sales, and BusinessWorks couldn't keep up.

The growth also affected Kenmore Label & Tag's ability to manage the rapidly increasing number of parts, inventory, and in-house production activities.

Other business operations also fell behind, including inventory control, sales, purchasing reporting, part histories, and quoting systems.

With its processes tightly integrated by SAP Business One, Kenmore Label & Tag runs as efficiently as it had envisioned. The company easily manages its in-house production and inventory and experienced a 10% growth in sales, a 5-10% increase in order accuracy rates, and improved order processing from 10-15 customer orders daily to 20-25.

We chose SAP Business One because it has all the business components we need—from inventory to reporting to sales—in a single solution."
