Innovation

- Drive Twincraft innovation by translating market insights and unmet consumer needs into viable prototypes.
 - Participate in ideation sessions.
 - Flesh out ideas into full concepts.
 - Create 'looks like – feels like' prototypes.
 - Refine prototypes by addressing death threats through a series of rapid testing cycles.
 - Provide technical expertise in the evaluation of the business viability of concepts and prototypes throughout the innovation cycle.
 - Initiate and lead trial runs. Make decisions (i.e. adjust process conditions) during trial and formally report results.
- Support and help implement continuous process improvements.
- Support and adhere to Twincraft's values and credo.
- Perform other duties as assigned.

Education and Experience

Bachelor of Science degree in Chemistry is preferred, Natural Sciences, Food Science, or Cosmetic Science could be applicable with relevant work experience. Four plus years experience in Personal Care product development is preferred but not necessary.

Personal Characteristics

- Positive and collaborative attitude
- Solution-based problem solver
- Flexibly handle multiple tasks and multiple priorities
- Ability to work within a team and contribute individually
- Self-driven accountability
- Professional communication skills between vendors and customers
- Passion for skincare and trends
