

# A One-Source Resource

Project Management | Equipment Solutions | Marketing Services

**Keeping up with the fast pace of new construction can be overwhelming. Each day brings an infinite number of decisions to make, timelines to follow and deadlines to meet—and not enough time in the day.**

At the same time, you need to stay informed with new technological innovations—selecting the right equipment for your clinical, operational and financial needs.

## **How can you simplify decisions and maximize resources?**

Siemens provides one comprehensive solution for new freestanding emergency rooms under construction. With Siemens as your one-source equipment resource, we can help you achieve increased efficiency, along with several additional benefits:

### **Equipment:**

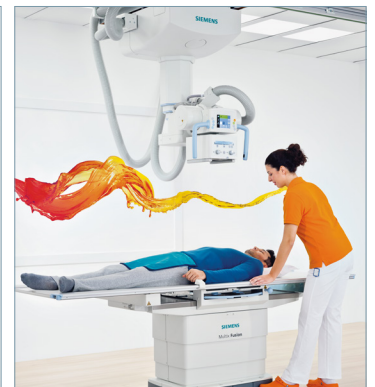

- **New and refurbished CT systems** with a selection of service plans tailored to your budget, helping ensure your CT stays up and running.
- **Digital X-ray systems** generate images that can be read as soon as the image is captured.
- **Portable ultrasound units** for all patient types.
- **Mini-PACS** provides the ability to store, send and read images remotely.

**Consistent communication** – Through a strong collaboration, your Siemens Project Manager will drive consistent and reliable communications with your realtor and contractor.

**Flexible financing** packages are available.

**Personalization** – Solutions are tailored to your needs and budget for the best use of time, resources and money.

**Visibility** – Expert marketing support helps you promote the benefits of your new facility to the community and referring providers.

## The 16-slice SOMATOM Scope

The SOMATOM® Scope provides outstanding image quality at the right dose with an improved technologist workflow. Thanks to highly reliable, easy-to-use workflow features, the SOMATOM Scope enables your technologists to deliver consistent study quality. With one of the smallest footprints in the industry, the SOMATOM Scope fits in some of the smallest diagnostic settings. Finally, with a suite of technologies that optimizes the scanner operation and reduces wear and tear on one of the most expensive components, the SOMATOM Scope delivers an attractive, ongoing total cost of ownership that has reduced the total cost of owning a CT by 35%\*.

To discuss our solutions for your freestanding ER, with special financing arrangements for qualified customers available through Siemens Financial Services, please contact your local Siemens Healthineers sales representative.

**Multix Select™ DR.** High-quality digital X-ray has never been so affordable. The Multix Select digital radiography system's floor mounting and small footprint can accommodate even the smallest clinical setting. This affordable system is built with many of the same functions and components as our higher-end DR solutions, meaning you can support higher levels of patient satisfaction with faster exams and better clinical coverage.

**ACUSON P500™** ultrasound system is an adaptable, point-of-care portable ultrasound system engineered to scale a wide range of environments and patient types.

The system delivers sophisticated technologies used in Siemens' most advanced ultrasound equipment to ensure excellent image quality, smart workflow and durability, all in a compact notebook format. With reliable and fast imaging, the ACUSON P500 is particularly suitable for use in emergency medicine and general imaging.

**Mobilett Mira Max™** is your mobile imaging companion that brings a broad range of extraordinary MAX advantages to the ER—in a compact, powerful X-ray system that's always ready to go. It's the only mobile system in the world to combine the positioning flexibility of the MAXreach tube arm with the handling convenience of our low-weight MAX detectors. It lets you solve challenges

**ACUSON NX3™** ultrasound system is simple, yet powerful. When form needs function, the result is intuitive and smart ultrasound systems that will help promote your highest level of performance. The Siemens ACUSON NX3 Series ultrasound systems enable a smarter, new way of scanning—offering you performance without compromise. Scan smarter with a streamlined control panel that has 28% fewer keystrokes and 3x more user-customizable settings. Experience higher

resolution with Siemens exclusive 16 MHz transducer which delivers advanced superficial imaging to support your disease characterization efforts.

like narrow rooms and incubators with precision and ease. Experience mobile imaging as effortless and as fast as it should be.
