SIEMENS

Service Comparison Worksheet

Do you know the total value of your service contract?

Get a side-by-side comparison.

When you're comparing service contracts, you can't depend on the price tag to tell the whole story. Understanding exactly what's included in each service contract will help you assess real value to make the best decision for your imaging facility.

How to use this worksheet

Review each category to see the value Siemens Service offers. Then ask any third-party service vendor to complete the right-hand column to get a true service comparison.

Siemens	Third-party vendor
Direct around-the-clock access to Siemens highly trained engineers enables you and your team to confidently operate your imaging equipment and software. Our US-based Service Center answers calls on average within 26 seconds, so you get your problem handled quickly and efficiently.	
Our service engineers stay up-to-the-minute with 100 hours of training per year. And many Siemens engineers have advanced certification that's not available anywhere else. We're the ultimate experts.	
Siemens-certified technical and applications training equips your staff to get the most out of your systems for improved patient care and better results.	
Siemens Remote Service — Our remote repair technology guarantees your imaging equipment will be up and running faster. We make <i>almost</i> <i>half</i> of our repairs remotely — meaning less down time spent waiting for an engineer to come fix a problem we can address over the network.	
The Guardian Program [™] — Proactive monitoring can prevent problems before they happen, minimizing unscheduled downtime. (For select CT and MI systems: TubeGuard guarantees we'll predict imminent tube failure or pay for your TubeGuard coverage.)

	Siemens	Third-party vendor	
Uptime	Siemens guarantees up to 99% uptime for system availability, giving you the assurance that you'll have minimal unplanned downtime.		
On-site response times	We guarantee arrival of our engineer on-site within a specified timeframe (determined by contract) or we extend your contract. And we come prepared with a diagnosis, parts and a plan for repair so you're back up and running quickly.		
Availability of manufacturer- guaranteed parts	We guarantee Siemens ISO 9001-certified parts availability and rapid delivery from 17 depots across the country. So you're not stranded with down equipment, while waiting on the proper parts.		
MAXIMIZED PRODUCTIVITY AND ROI			
Obsolescence protection	syngo [®] Evolve [™] — Automatic updates on software and hardware ensure continued maximum imaging quality for the life of the system (up to two).		
Utilization reporting and workflow consulting	Utilization Management — Comprehensive reporting on your systems' usage patterns allows you to maximize workflow and productivity.		

What will you sacrifice if you choose a third-party service contract? Revenue? Patient care? Your reputation?
