

Realizing Possibilities Through Impactful Talent Solutions

CMP Search Risk Free and High Impact Search

CMP's search model is a highly effective talent acquisition resource, when there are leadership and professional level positions that are challenging to fill, or the number of openings makes it necessary to elicit search real-time.

CMP Brings Unique Value

Comprehensive Candidate Assessment Approach That Delivers Results

We identify key job requirements and hiring criteria for each role that needs to be filled. We then identify and put our candidates through a comprehensive screening process, complete with n-depth interviews and validated assessment to insure they conform to the requirements of the role, strategy and company culture. Upon their placement, we continue to stay in touch and provide assimilation coaching with each candidate to ensure they have a successful onboarding and transition process. You can always rely on quality and speed in our candidate generation and selection process. We will also provide a replacement search, should the candidate depart the organization within six months of their employment date.

National Search Delivery Capability

We maintain a proprietary national database of contacts and candidate resumes. We also have partner offices in most major metro areas across the country. This enables us to engage local and national resources in completing a search
