50
years

Celebrate the 50th Anniversary of
World Earth Day on April 22nd with
Advanced UK and Xerox™

312 billion
pages printed and
copied by UK firms
every single year

37 million
trees harvested
annually just for
printing & copying

65%
the percentage of
documents destroyed
on the same day they
were printed

2.85 Kilos
carbon emission
generated for every
printer support call

Statistics sourced from Microsoft Corporation,
the ONS, and Statista

There's a better way!

The Advanced UK 'Green Team' is introducing our unique Corporate Social Responsibility programme to help you tackle the urgent environmental change which faces every single business.

So, we're inviting you to a very a special event at the brand new Xerox™ Innovation Centre in Uxbridge in celebration of World Earth Day, because we want you to discover a sustainable way to replace those trees, to reduce the amount printed, and to work smarter!

Interactive & educational

It's interactive! We'll show you how to guarantee to your staff and clients that you can replace every tree consumed!

We will be showing some novel print technology too, such as using your office printer to converting document from text to audio, or to translate entire documents on-the-fly.

For your IT and leadership teams, we'll explain how to get rid of your expensive (and polluting) print servers!

Be a leader! See how 'going green' can reduce costs and contribute to a true social benefit of which you can be proud.

Free registration!

Refreshments and buffet lunch included!
