Top 10 - Health and Safety Item Failures

Top 10 - Health and Safety Item Failures

MAKE INFORMED DECISIONS WITH KEY INSIGHTS

Let's face it. The construction process is fast and furious out on the site. Your construction managers cannot be at every address, every minute of the day. **However, with the DPIS web tool, you are directly connected to instant information about what is going on in the field.** This will allow your construction management purchasing teams to make more educated decisions about their trades.

EVERYTHING YOU NEED TO KNOW, AT YOUR FINGERTIPS

DPIS Builder Services has rebuilt our inspection reports and created a web tool that you can access right from your smartphone to track all types of ICC Code data. This gives the builder information as to what trades might not be understanding of the latest codes right at their fingertips. Now your CM's will have all they need to know what their trades are doing right and wrong anytime, anywhere.

INSTANT REPORTING:

- New FrameNET Inspection Reporting
- See Top Inspection Infractions in an instant
- Top level staff see both frame and final QA results at Area Manager or Construction Manager level
- Top level staff see various Warranty information
- Top level staff see the Top 10 Health & Safety infractions happening per job site
- See average days it takes to build the home, and the number of days per stage
- And much more!

BUILDER BENEFITS:

REDUCE RISK

- Instant reports on major Health & Safety items
- Helps catch potential high cost warranty items or missed inspections

LOWER COSTS

- Reduces the need for extra administrative staff to keep up with paperwork

BUILD FASTER

- Instant inspection ordering & schedule/timeline view
- Instantly download inspection results
