

## 6 Unknown DocConverter Features for PDF Conversion

# DocSight™ DocConverter

DocConverter enables you to convert hundreds of file types to and from PDF and PDF/A. DocConverter also includes a few features that you may not realize you have at your fingertips.

### Convert CAD to PDF

DocConverter now includes a converter for CAD .DWG files. This is a valuable tool for engineers, designers & architects wanting to convert CAD-specific files to PDF with speed and high fidelity.

### Secure with HTTPS

In a COM environment, use HTTPS for secure connections with the *UseSecureConnection* property. See the DocConverter API Reference Guide at [www.ActivePDF.com](http://www.ActivePDF.com) for details.

### V12 Engine Add-On

Allows you to convert .doc/.docx and .xls/.xlsx files as PDF/PDFA without the use of Microsoft® Word or Excel to open and manage PDF documents. Fast, flexible and reliable, V12 Engine add-on enables users to quickly convert to PDF without additional corporate licensing or open-source from third-party vendors.

### Conversion Scheduling

With DocConverter, you can use Configuration Manager to set up a schedule and a duration time to run conversions; configure watermarks to add images or text to your output PDF files.

### Extract Digital Signature Details

Use DocConverter to extract digital signature details from emails. Easily extract and store the signature certificate, saving contact entries for archive or later use.

### Combine Image Files

When converting PDF files to images, combine the output images into one image file. By default, PDF-to-image conversions create a single image file for each PDF page.
