Protecting the data you share

Overview

In 2017, more than 150 million Americans had their personal data compromised or stolen. That means there's almost a 50 percent chance that you or one of your family members were one of those people.

Resolving issues of fraud or identity theft can take weeks, or even months. But you now have access to PrivacyArmor, the industry leader in identity protection services that alerts you at the first sign of fraud. Get alerts for credit score changes, accounts opened in your name, compromised credentials, financial transactions, and more. Enrolling your family extends that protection to anyone in your household.

In the event of a fraud, you won't have to figure out what to do — a dedicated team will fully manage and restore your identity.

- Identity and credit monitoring through Transunion

- \$1 million identity theft insurance policy

Pricing

- _____ per employee per month
- _____ per family per month

FAQs

Who is the provider?

InfoArmor is the industry leader in proactive identity protection. For 10 years, they have been at the forefront of fighting the ever-evolving threats of identity theft and data breaches.

How can this help me?

InfoArmor leads the identity protection industry with PrivacyArmor®, a proactive monitoring service that alerts you at the first sign of fraud and fully restores your identity. PrivacyArmor includes:

- Identity and credit monitoring
- Dark web credential monitoring
- Monthly updated credit score and annual credit report
- Social media reputation monitoring
- Digital wallet storage and monitoring
- Financial threshold monitoring
- Full-service fraud remediation with a dedicated Privacy Advocate
- \$1 million identity theft insurance policy

Who is eligible?

All employees [and their family members] are eligible.

When can I enroll?

Enroll now to protect you and your family from the hours of painstaking phone calls, mailed reports, fees, and heartache of identity theft. One you enroll, you can log in to your online portal to activate credit monitoring and view identity alerts, verify your account information, and add your family. You can also check your credit score, connect social accounts for monitoring, and more.

How much will this coverage cost?

Discounted pricing is only \$___ per employee per month. [If you would like to enroll additional household members, it is only \$___ per family per month.] Payment for your plan will be one convenient payroll deduction.

What if my employment status changes?

If you leave or retire from your current employer, you can continue your coverage without interruption, subject to applicable law and the policy's terms and conditions. Although payroll deduction will no longer be available if you retire or leave your company, you can opt for direct checking or bank account deduction, credit card billing, or home billing. Higher rates may apply.

My bank/credit card offers identity protection. Why would I need InfoArmor?

InfoArmor invests considerable resources into developing and advancing identity theft technology, and also spends hours learning how identity thieves work. This means that our identity protection service is far broader and more comprehensive than monitoring through a bank or credit card, which usually only monitors credit. Not only does InfoArmor monitor it all, we will also fully manage and restore your identity in the case of fraud, which means you do none of the legwork. Finally, our \$1 million identity theft insurance policy means that you don't have to cover the costs of recovering your identity.

Is it safe to give InfoArmor my information?

InfoArmor's comprehensive information security policy applies to all of its employees, consultants, contractors, and vendors:

- Your information is stored solely in an encrypted data center on non-public networks behind firewalls using network address translation and address control lists
- Security protocols enable only a limited number of professionals to access data on a need-to-know basis
- All facilities utilize the latest security measures, as well as state-of-the-art surveillance and alarm systems

If you have any questions about this identity protection service, you can contact InfoArmor at 1.800.789.2720.
