Why Employers Should Care When Employees Have Their Identities Stolen

Why Employers Should Care When Employees Have Their Identities Stolen

Year after year, identity theft causes personal and financial harm, and it's not only your employees who end up paying a price. When your employees have their identity stolen, this can spell big problems for your business as well. Let's take a closer look at why this is the case, and, most importantly, what you can do to protect your company's greatest asset — your employees.

State of identity theft

With data breaches occurring at an alarming rate, it's no surprise your employees are concerned with having their identity stolen. In 2019, 65% of all data breaches resulted in the theft of personal information – compromising more than 14.4 million people's identities.¹ So, the chances that your employees will experience identity theft in the future, if they have not already, is a very real possibility.

#1

Identity theft was the **most common fraud complaint** reported to the FTC in 2019²

13%

Identity fraud Iosses increased 13% over the prior year to a total of \$16.9 billion (USD) in 2019³

#1

Americans rate criminal hacking as the **number one threat** to their health, safety, and prosperity⁴

41%

of Americans have been either **a victim, or know someone who has** been a victim of identity theft⁵

21%

of those who have experienced identity theft have been the victim of **multiple incidents**⁶

Employers often play a role in employee identity theft

Why Employers Should Care:

Employers often play a role in employee identity theft

One of the many reasons employers should care about identity theft is that they often directly contribute to their employee's identity being stolen, despite the best of efforts. In fact, employers are often the biggest culprit in breaching individual privacy. This is largely because state and federal laws require employers to maintain a tremendous amount of personal information on every employee, from Social Security numbers to addresses.

- In most instances, cybercriminals are able to steal every employee's personal data in a single attack
- 33% of phishing attacks come from emails designed to appear as though they are coming directly from the CEO of an organization⁷
- Identity theft is often perpetrated by fellow employees and sometimes even managers and executives
- As much as 50% of identity theft originates in the workplace⁸

Why Employers Should Care:

Identity Theft Costs

Identity theft costs

In addition to the moral obligation an employer has to help protect their employees' identities, they also have a financial one. When employees have their identities stolen, companies can pay big.

Courts are increasingly holding employers liable for the loss of their employees' confidential information, even in the absence of a specific law requiring them to protect such data

35% of companies said identity theftrelated attacks led to the loss of productivity and another 8% said the attacks damaged their company's reputation⁹

When employees have their identities stolen, they can become easily distracted at work due to the tremendous financial and legal burden placed on them:

- 32% of victims said identity theft caused problems for them at their place of work¹⁰
- More than 77% reported increased stress levels and nearly 64% said they had trouble concentrating at work and home¹⁰
- It can cost your employees around \$13,000 out of pocket to resolve issues stemming from medical identity theft¹¹

An employer can also expect employees who are victims of identity theft to miss a significant amount of work. The average amount of time required to resolve the repercussions of identity theft can take up to 200 hours — or approximately six months — per person¹²

G W

Gallup's annual State of the American Workplace 2017 report found companies with low levels of engagement, when compared to companies with high levels of engagement, experience:¹³

- 20% lower sales
- 17% less productivity from identity theft
- 21% lower profitability
- Between 24% 59% higher turnover
- 70% more employee safety incidents

A Partner In Online Protection:

We're here to help you protect your employees

We're here to help you protect your employees

Research by Willis Towers Watson found that 36% of employers currently offer identity protection as a voluntary benefit and 63% of employers plan to extend it by 2021, making identity theft protection one of the fastest-growing benefits offered to employees today.
