## SUMMARY

Scott + Reid administrators found ADP’s employee engagement process still left them with a number of manual processes, such as vacation tracking, benefits cost tracking and onboarding. This motivated them to improve their employee engagement process and to look for more user friendly reporting options. Scott & Reid wanted employees to be able to take control of their benefits selection. They also wanted to provide more detailed information, such as total compensation statements, to employees on benefits.

## SERVICE SOLUTIONS

## WHY WE WON

Netchex’s web-based, integrated solutions gave Scott + Reid complete control over payroll, benefits, and human resources information. With automatic additions of new hires, integrated background checks and streamlined on-boarding, NetHire & NetGuide allowed Scott + Reid to focus on finding highly-skilled employees.

The single sign-on and clear communication of available benefit plans within NetBenefits made enrollment in online benefits a simple, streamlined process for Scott + Reid. Employees can also log into Netchex and all of their information is available right at their fingertips.

Employees have access to W-2s, total compensation statements, payment history and more on their personal dashboards. Additionally, NetGuide’s ability to alert individuals of upcoming events and required human resource activities reduced the burden of manual alerts. Overall employee engagement is improved by giving employees better access to their own information.
