

TELL US A LITTLE BIT ABOUT YOURSELF

My name is Megan Gann, HR Manager for Camp Gladiator. We're a fitness company on a mission to positively impact not only people's fitness, but their lives as well! I was a camper before I started working for the company and have never believed in a company's mission like I do Camp Gladiator! Not only has this company impacted MY life for the better, I've seen hundreds and thousands of lives changed since I started working here. There is no better feeling than getting to do what you love and what you're passionate about.

I'm married to the love of my life, Dustin. We've got 2 fur babies – Silas [Golden Retriever] and Piper [Corgi]. Besides CG and getting my sweat on, I love to travel, have a passion for music and enjoy the great outdoors where I hunt with my husband and family.

THE EXPERIENCE

Since we put Netchex in place, life as I know it has drastically improved! I now have access to the information I need. Candidates have a MUCH improved onboarding experience that starts before they step foot in the door on their first day. Our Open/Initial Enrollment process is so much smoother without having to fill out a ton of paperwork – just a few clicks of a mouse and they're done.

Netchex Services:

Time & Attendance

Employee & Manager Self-Service

NetRecruiter

NetGuide

Everify

BUSINESS IMPACT

Before Netchex, things were extremely manual. I tracked everything in excel or Google docs. As the HR Manager, I didn't have access to our previous payroll system and had to rely on Accounting to pull reports or provide me info I needed. Our onboarding process was much more manual as well, and don't even get me started on Open Enrollment! I have PTSD thinking about the past! If we had not put Netchex in place, we would still be in a very manual world, and that would have hurt productivity and new initiatives that have been put in place since Netchex implementation. The tool has allowed us to grow more efficiently and save time – which ultimately equals \$.

WHY YOU SHOULD CONSIDER NETCHEX

Netchex provided us with the best solution for our needs. During a discovery meeting, we got our questions answered by one of the engineers – not just a sales person. We looked at other reputable platforms, but this was the best fit for us and a no brainer after considering our options. My favorite part is that we are assigned to a TEAM of people who are able to help us – not one specific person. Our experience so far has been fantastic! We're not having to go through our days and weeks doing manual processes anymore.
