

# CASE STUDY

## ABOUT SLIM CHICKENS

Slim Chickens started with a mission to bring a dose of that southern hospitality to a fast, casual setting—serving fresh handmade food to the communities they serve. When they discovered there was a niche to fill, they rallied where lots of great startups begin, from their garage! Tireless testing and a laser focused vision launched the first Slim Chickens restaurant in Fayetteville, Arkansas, 2003, and how has over 60 locations.

## LIFE BEFORE NETCHEX

We spoke with Lydia, their Payroll and Benefits Manager, who has been working with Netchex since they made the switch in 2016. In her spare time, Lydia loves to write music and spend time with her family.

**“Night and Day between Netchex and ADP, allowing for incredible efficient processes”**

**Netchex Services:**

- NetCobra
- NetBenefits
- 401(K)

- Pay Card
- NetGuide

**ROSNET**

## NETCHEX “TALKS” WITH SYSTEMS

One of Lydia’s favorite features of Netchex is that it talks with other systems. At Slim Chickens, she currently utilizes Rosnet, a fully integrated restaurant solution. Netchex’s integration capabilities make it possible for her to share vital information from one system to the next, making sure everything is cohesive, accurate and up to date.

## EASE OF ONBOARDING

With NetGuide, the onboarding process is easy and customizable for each employee coming on board. At Slim Chickens, Lydia not only uses the basic tasks to get new hires onboarded, but she has custom tasks based on their position codes and job types. Depending on their role, Netchex sends specific tasks to these pre-selected people to complete without having to send out any additional notifications, making Lydia’s job easier and more efficient.
