

## WALK-ON'S ENTERPRISES

• Baton Rouge, LA

Industry	Company Size	Previous Provider
 Restaurant	 675	

### SUMMARY

As the parent company of four restaurant brands and over 11 stores, Walk-On's Enterprises needed a better reporting mechanism for cross-company data analytics. They were looking for a system that could accommodate flexible employee types like their floaters, who worked at various locations. The Walk-On's team also struggled with manual, duplicate data entry of new hire data between APS and their Aloha POS System, resulting in inaccurate information and jeopardizing data integrity. Inaccurate full-time equivalent (FTE) reporting gave Walk-On's administrators added concerns with Affordable Care Act (ACA) compliance.

### SERVICE SOLUTIONS

### WHY WE WON

Walk-On's Enterprises no longer had to coordinate multiple entries in multiple systems. Netchex employee copy feature eliminated the need to manually enter data in multiple systems, increasing accuracy, efficiency and data integrity.

NetHire and NetGuide allows Walk-On's Enterprises to hire the top-notch restaurant & catering staff they demand. Additionally, NetGuide facilitates the onboarding process and allows managers to capture accurate data for new hires.

Walk-On's ACA concerns are eased with Netchex's ACA Central Dashboard which generates and distributes required documents to both the IRS and employees and provides FTE calculations. Managers also have access to automated labor cost analysis and proactive monitoring of overtime to help facilitate staffing decisions.

The flexibility of the Netchex system gives Walk-On's Enterprises a scalable human resources solution that can grow with them as their company grows.
