

Whats makes it ThermoGrip?

- The ThermoGrip backing technology gives the mat a non-slip surface by utilizing the benefits of both nitrile rubber and vinyl compounds. It has been tested and approved by the NFSI certification.
- The Nitrile rubber compound will allow the backing to resist grease and oils. It will work in a variety of applications where grease and oil may be found in a building.

ANTIMICROBIAL FLOOR MATS

What makes ThermoGrip backing different?

We created our ThermoGrip bottom surface to be the strongest vinyl backed mat formulated with nitrile rubber to resist cracking in extreme temperatures. The Nitrile rubber gives the mat backing flexibility and strength to prevent the edging from becoming brittle in harsh weather and cracking or separating from the mat. The Vinyl gives the mat the sturdiness that allows the mat to be both rigid and flexible to prevent the edges from curling like you may find in many other floor mats. Crown's unique ThermoGrip technology helps keep the mats flat and to the floor surface.

To increase the safety of entrance ways, ThermoGrip mats were designed to be the very best entrance mat to uphold to high volumes of foot traffic for commercial retail stores, hotels, airports, education, healthcare and government industries.

ThermoGrip entrance mats are NSF Certified for "High Traction".

Experience the Crown Mat Difference!

For more than 80 years, Crown Matting Technologies has dedicated itself to refining the art of producing floor mats for commercial and industrial purposes. Through our exclusive innovative technologies, we continuously enhance our products to offer unmatched value to the industry.

Our range of customization options allows you to tailor your floor mats to suit your specific environment. Choose from a variety of colors, textures, thicknesses, sizes, borders, and backing options to find the perfect mat for your entrance or workspace.
