

## Whats makes it ThermoGrip™?

- The **ThermoGrip™** backing technology gives the mat a non-slip surface by utilizing the benefits of both nitrile rubber and vinyl compounds. It has been tested and approved by the NFSI certification.
- The Nitrile rubber compound will allow the backing to resist grease and oils. It will work in a variety of applications where grease and oil may be found in a building.

## What makes ThermoGrip™ backing different?

We created our **ThermoGrip™** bottom surface to be the strongest vinyl backed mat formulated with nitrile rubber to resist cracking in extreme temperatures. The Nitrile rubber gives the mat backing flexibility and strength to prevent the edging from becoming brittle in harsh weather and cracking or separating from the mat. The Vinyl gives the mat the sturdiness that allows the mat to be both rigid and flexible to prevent the edges from curling like you may find in many other floor mats. Crown's unique **ThermoGrip™** technology helps keep the mats flat and to the floor surface.

To increase the safety of entrance ways, **ThermoGrip™** mats were designed to be the very best entrance mat to uphold to high volumes of foot traffic for commercial retail stores, hotels, airports, education, healthcare and government industries.

**ThermoGrip™** entrance mats are NFSI Certified for "High Traction".

## Experience the Crown Mat Difference!

For 75 years strong, we've been perfecting the science of floor mats for commercial and industrial applications. We have been using proprietary innovative technologies to further our products and provide incomparable value to the industry.

We provide more options to customize your floor mats to fit your unique environment. We offer our customers a wide selection of colors, textures, thicknesses, sizes, borders, and backing options to select the best mat for their entrance or work environment.

**ThermoGrip™** technology is produced on our highest quality vinyl mats.
