HONEYCOMB VTL
VIRTUAL TAPE STORAGE

veeam | GLOBAL Innovation Award Winner

PARTNER AWARDS 2018

probax

"Set and forget long-term archival storage. Once you use Honeycomb VTL, you'll never want to back-up to physical tape."

OVERVIEW

Fully integrated with Veeam Cloud Connect, Honeycomb VTL makes archival and retrieval of data seamless and direct.

With a simple, predictable pricing model and incredibly low costs for data storage, businesses can leave behind the risks and inefficiencies of legacy tape hardware.
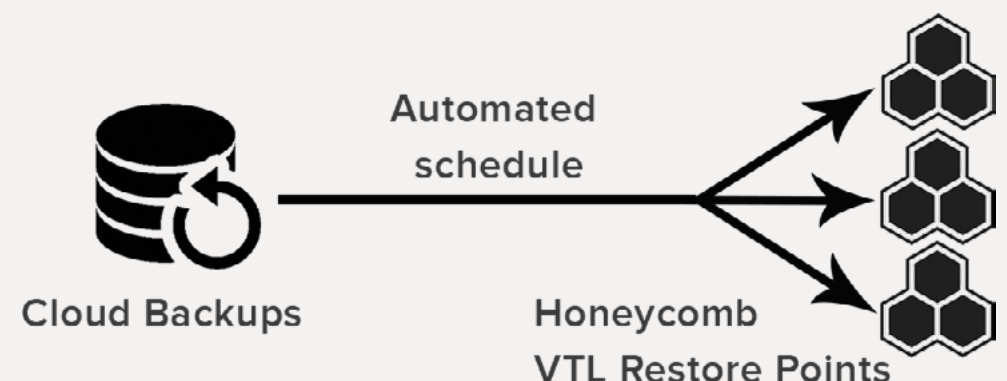

- Durable, secure & highly available storage built for 25+ years retention
- Cost-friendly pricing model for long-term storage with no hidden data transfer or retrieval fees
- Integrates with Veeam & Dropbox

Cloud Backups → Automated schedule → Honeycomb VTL Restore Points

HIGHLIGHTS

SIMPLICITY

Honeycomb virtual tapes are created directly from your primary storage according to a set and forget schedule, eliminating the need to transfer additional data to Probax. Restore files & directories to primary storage in a single click.

SECURITY

The volumes of your data are securely "air-gapped" - they cannot be accidentally or maliciously deleted before the set expiry date.

SCALABILITY

Seed legacy data via cross-connect, external HDD or send direct to virtual tape from existing backups in Control. Your storage dynamically scales your Honeycomb capacity up or down automatically according to conditions you define.
