

CONTROL CLIENT PORTAL

“

*Multi-tenant portal
to manage & monitor
your backups and
deploy remotely.*

”

OVERVIEW

Control is our multi-tenant, multi-vendor portal to maintain your organisation's back-up, business continuity and disaster recovery needs; all in a single-pane-of-glass view.

Keep on top of what you need to know with our intuitive dashboard and drill down into individual sites for detailed status reports, compliance & billing.

KEEPING IT TOGETHER

FUNCTION

The product of over 10 years experience specialising in cloud BC/DR, Control gives IT teams everything they need to reliably, securely and cost effectively manage their organisation's critical data in the cloud.

CORNERSTONE

Control is the central console of the Probax platform from where you can monitor and administer site backups, set up reporting, view billing, deploy agents, initiate failovers and more.

VALUE FOR GROWTH

Generate greater efficiencies of scale for your business as the suite of automated monitoring & reporting tools built into Control frees up the time of your techs. Designed for the SMB market, it gives technicians full-visibility of their backups at an industry-leading price point.
