

DISASTER RECOVERY AS A SERVICE (DRaaS)

VEEAM

DISCOVER CLOUD CONNECT

FUNCTION

If a VM becomes unavailable or fails in case of a disaster, you can fail over to a VM replica and quickly restore services in the production environment. Users can then access services & applications they need with minimal disruption.

NETWORKING MADE EASY

The built-in Veeam Network Extension Appliance streamlines communication between production VMs on the tenant's side & VM replicas on the cloud host, backup infrastructure & external network nodes.

COOL IN A CRISIS

1-click failover orchestration for reliable, quick execution. Instigate full site and partial site failover to the Probax DR site from anywhere.

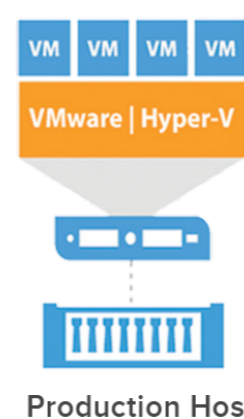

Reliable, image-based VM replication delivering sub 15 minute RTPOs

OVERVIEW

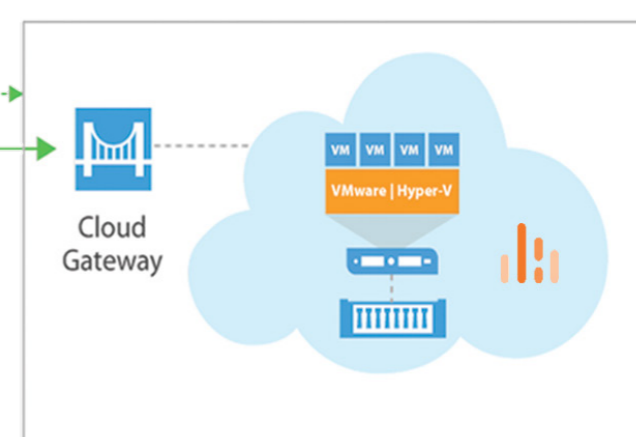

Probax allows you to replicate local Veeam protected servers and turn them on in our infrastructure.

Whether a single server is offline or the whole site, failing over is straightforward and automated, and will have your customers back online in minutes.

Customer Site

Probax

- ✓ Straightforward licensing & pricing
- ✓ DR for any workload - storage application & OS agnostic
- ✓ Advanced networking capabilities
