

SCOUT AUTOMATION

Automatically seek out, report and resolve local backup issues

OVERVIEW

Scout is the link between the Probax cloud and your client's backups.

It works in the background to deploy backup agents, seek out and automatically repair errors, creating greater efficiencies of scale for your support team.

HIGHLIGHTS

FUNCTION

Scout automatically identifies and fixes broken backup chains and individual file corruption issues to make sure your customers always have a healthy backup chain

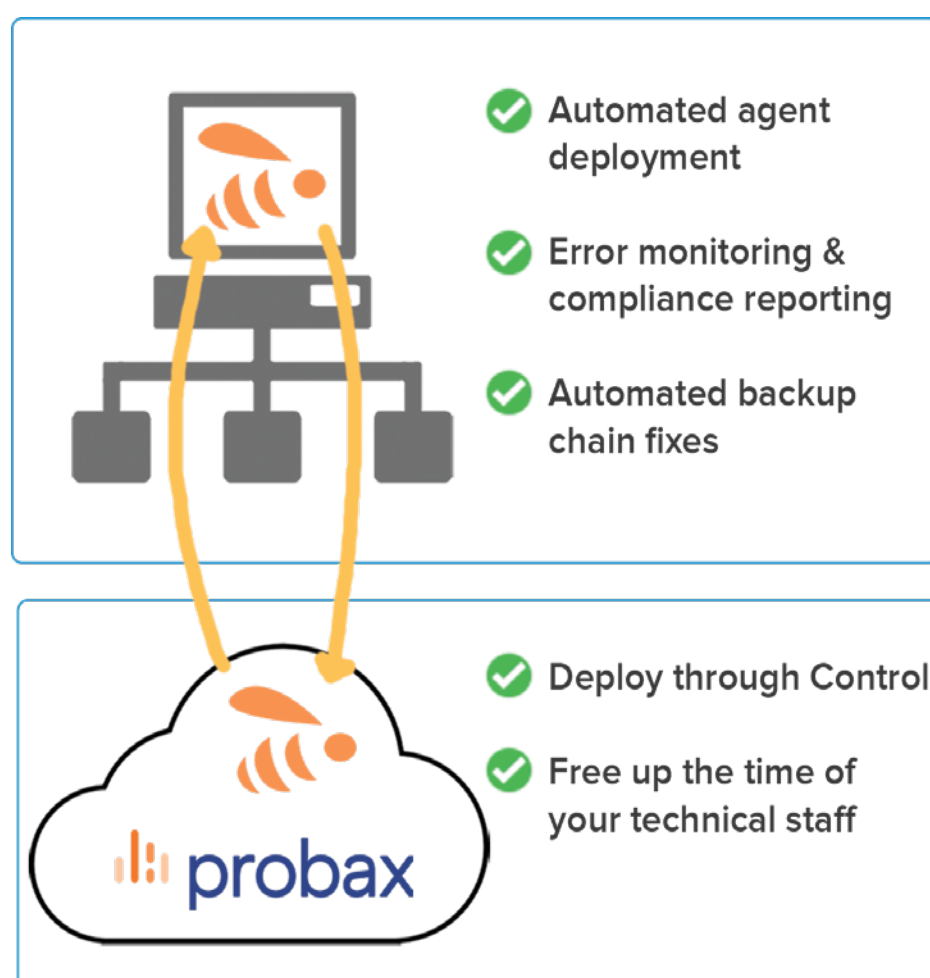

COHESION

Scout is built-in and ready to activate through Control. It will soon become an indispensable part of your intelligent business continuity and disaster recovery solution.

EFFICIENCY

Let Scout handle the time-consuming but critical maintenance of client backups. Keep track of actions taken and issues resolved from Control and be confident the backups are in good hands!
