

DOS Support & Listing Services

Digital Outcomes and Specialists (DOS) is a ground-breaking framework with a low barrier of entry to interested suppliers, you simply need to get listed and start applying for tenders. To date over £212m has been sold through DOS.

We can help you with your submission to get you successfully listed on the framework. But most of all, we ensure you will be in with a good chance of winning some contracts once you are on DOS through our expert 'Winning with DOS' workshops.

Our clients have won millions of pounds in COLD opportunities across all DOS Lots, which includes work for large government departments and the NHS.

The team at Advice Cloud supported us with our framework strategy which included securing a listing on DOS1 and DOS2. We engaged their post-award services which included bid and call-off reviews and were subsequently very pleased to secure a public sector contract. We found Advice Cloud to be very professional, attentive and good at accommodating our business needs and we would positively recommend the team to any organisation needing similar support.

Jeff Motto
CEO at Leading Resolutions
