

# DIGITAL TECHNOLOGY SERVICES

The Digital Services Dynamic Purchasing System (DPS) 2.0 is an opportunity to provide tech services to the Scottish Government. The DPS supports the Scottish Government's digital strategy (2017) and provides access to digital skills and support the delivery of agile projects.

With Scotland's GovTech market estimated to be worth a massive £1.2bn+ in sales and the DPS already open for applications, the Digital Technology Services is a great way for suppliers of digital services and resources to win business.

The DPS is divided into three Lots:

- Lot1: Digital Projects
- Lot 2: Digital Resources
- Lot 3: Cyber Security Services

**Our fully managed service can help you get listed on the Digital Tech Services DPS quickly, pain free and with a listing of the highest quality. And, once you are listed, it can help you win business!**

Depending on your needs and budget you can choose from:

## STANDARD

- Submission prep webinar
- Review and support with prepping your technical responses, compliance and pricing documents and supporting attachments and certificates
- All background questions answered
- Submission and QA
- Regular networking events
- Regular client only webinars

## STANDARD PLUS

- All services included in the STANDARD package
- 12 months Digital Technology Services bid support (4h per month)
- Account Management, including email support

## EVERGREEN

- A bespoke service ideal for companies where the public sector is a strategic priority. It includes a combination of framework listings (including Digital Tech Services), outstanding and unlimited online training, and coaching to ensure you achieve your Public Sector targets.
