

MEDICAL IT

NHS Supply Chain have recently published the spec for a renewal of the Enterprise and Departmental PACS and Information Systems (for example RIS) and Associated Goods and Services contract, more commonly known as Medical IT. The framework offers customers the opportunity to communicate with the leading suppliers in the UK marketplace for Healthcare IT solutions and associated ancillary software and hardware. The new version of this framework is set to open November/December 2019.

According to Global Data over £2.2bn was spent on Medical ICT in 2018-2019 alone. And, you could be one of the suppliers winning this business!

The framework is likely to have 2 Lots:

- Lot 1: Medical IT Software Solutions
- Lot 2: Medical IT Complimentary Hardware

With our support you can join the new Medical IT framework and start winning business. **We have a 100% framework success rate** and have recently listed all our clients on the highly competitive Network Services 2 framework. When you join Advice Cloud, **our fully managed service will help you get listed on Medical IT quickly, pain free and with a listing of the highest quality.**

The comprehensive services we provide include:

- Submission prep webinar - our team of experts will share with you our client only processes that will make your application process a breeze.
- Review and help prep compliance, supporting attachment and certificates
- All background questions answered - our team has already spent hours looking into the Medical IT framework and we will continue to do so throughout the application process.
- Submission and QA - the last step of our process is a in depth QA process that will ensure your application hits the mark with buyers. And, all that is left is to submit!
- Email support - Whatever your questions might be, our professional team of experts are here to assist.
