

FRESHLY GROWING WITH SAP BUSINESS ONE VERSION 9

It's Fresh! is a highly specialised technical innovations company focused on delivering comprehensive solutions for food freshness. These unique patented technologies are delivered by leading edge materials science developed in partnership with some of the world's renowned research and technology organisations.

Part of the Food Freshness Technology Group, with offices based in the UK and USA, It'sFresh products are used throughout Europe, USA, South & Central America, Australasia and Africa.

EdenOne worked with It's Fresh to complete the first phase of their installation and migration to SAP Business One Version 9. Adam Edkins, Technical Manager at It's Fresh, takes up the story...

EdenOne took the time to understand our business and how we function, more importantly what makes us successful. During installation EdenOne's team of consultants engaged with us to identify how we could get SAP Business One to work for us, as a result we were able to automate certain parts of our system and streamline our processes. The improvements to our system that EdenOne made enabled us to run much more efficiently, and as a company who have rapid growth ambitions, this was a huge benefit.

SAP MOBILE APPLICATION

As part of our migration and upgrade EdenOne set up the SAP mobile application which allows users who are outside of the office to access live system data and customer details wherever they are. It is essential that we have everything we need wherever we are and are able to access it quickly. EdenOne Solutions have enabled us to do just that.

EdenOne have tailored our cockpits to ensure each user has the most relevant content available to them all from one screen; each user was also given comprehensive training on how to manage and keep their cockpit up to date with all of the functionality they require.

A TAILORED INSTALLATION

We will soon be entering into a second phase of development with EdenOne to tailor our SAP Business One installation more specifically to our needs. EdenOne will be building tailored reports to ensure we get the correct information; in the correct format; at the click of a button. We will also be linking our USA office into SAP Business One so all of our operations are controlled centrally and are always live.

We wanted a system that could cope with every aspect of our rapidly growing business. EdenOne and SAP Business One have exceeded our expectations from the beginning and continue to provide us with up-to-date technologies to suit our specific needs.

“ It is essential that we have everything we need wherever we are and are able to access it quickly. EdenOne have enabled us to do just that. We look forward to continuing to work alongside EdenOne and would recommend their services to anyone looking to implement SAP Business One or just to take it that one step further. ”

Adam Edkins, Technical Manager
