

17 December 2018

HELIOS ENERGY LIMITED

PRESIDIO OIL PROJECT
Presidio County, Texas, USA

TRINITY OIL PROJECT
Trinity County, Texas, USA

ASX Code: HE8

DISCLAIMER

This document is for information purposes only. It is not a prospectus, disclosure document or offering document under Australian law or under any other law and does not constitute an offer or invitation to apply for subscription or sale in the United States of America or any other jurisdiction in which such an offer or solicitation is not authorized or to any other person to whom it is unlawful to make such an offer or solicitation.

The information in this document is an overview and does not contain all the information necessary to make an investment decision. To the extent permitted by law, no representation or warranty, express or implied, is made as to the accuracy, adequacy or reliability of any statements, estimates or opinions or other information contained in this document, any of which may change without notice.

Neither Helios Energy Limited (**Helios**) nor any other person warrants the future performance of Helios or any return on any investment made in Helios. Some of the information contained in this document constitutes forward-looking statements that are subject to various risks and uncertainties, not all which may be disclosed. These statements discuss future objectives or expectations concerning results of operations or financial condition or provide other forward looking information. Helios' actual results, performances or achievements could be significantly different from the results or objectives expressed in, or implied by, those forward looking statements.

Prospective investors should make their own independent evaluation of an investment in any securities. The material contained in this documents does not take into account the investment objectives, financial situation or particular needs of any individual investor.

Helios does not make any recommendation to investors regarding the suitability of any securities and the recipient must make its own assessment and/or seek independent advice on financial, legal, tax and other matters, including the merits and risks involved before making any investments.

CAPITAL STRUCTURE

Shares	1,416,721,015
Listed Options ^A	952,977,210
Performance Rights ^B	240,000,000
Cash	\$7,500,000
Market Cap at 15 cents ^C	\$212,508,152
Gross Acres of Leases ^D	66,776 acres

Note A: Each listed option has an exercise price of 2 cents and expires on 31 December 2021.

Note B: Each performance right has an exercise price of only \$0.0001 but cannot be exercised unless the performance milestone is successfully reached on or before 31 December 2021. The performance milestone is average daily production (net to Helios) (pre-royalty) of 1,200 barrels of oil equivalent (boe) per day (as determined by an independent petroleum reservoir engineer) from the Presidio Oil Project.

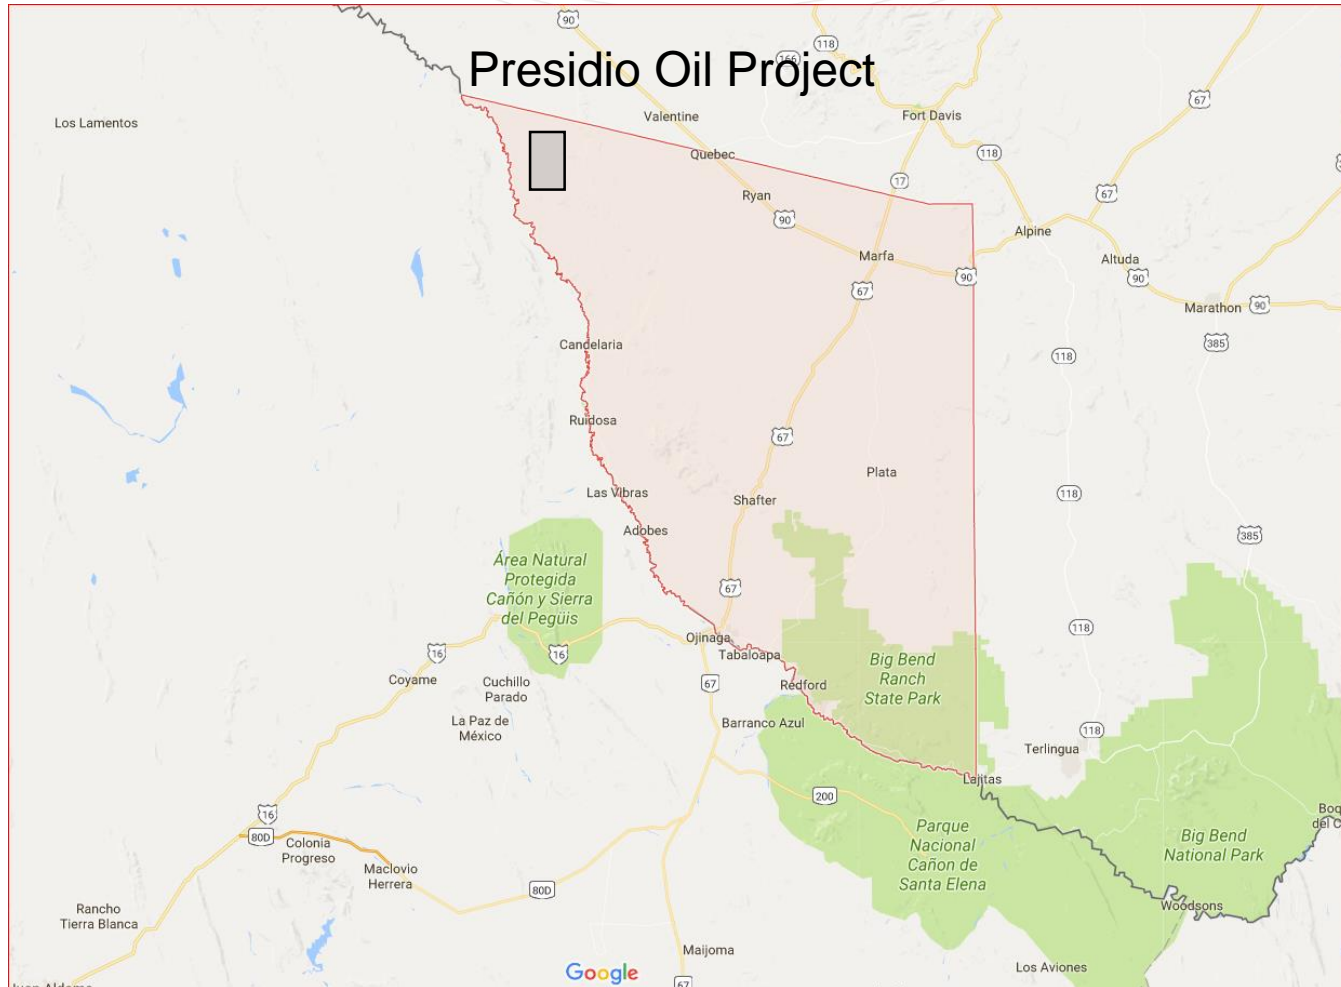

Note C: 15 cents is the closing price on Friday 14 December 2018.

Note D: Gross Acres for Presidio Oil Project only.

LOCATION – TEXAS, USA

PRESIDIO COUNTY, TEXAS, USA

NEW OIL DISCOVERY

New Oil Discovery - Presidio Oil Project (onshore Texas, USA)

- Helios is an oil and gas company focussed solely on Texas, USA
- Helios raised \$18m and listed on ASX in August 2017 at 2 cents per share
- Drilled 2 vertical wildcat wells: Quinn Creek 141 and Quinn Mesa 113 (2 miles apart)
- New Oil Discovery in the Ojinaga Shale Formation
- In June 2018, Helios successfully completed a one stage frack in the Quinn Creek 141 well to test the lower Ojinaga Formation (at 4,800 feet depth)
- Well flowed 260 barrels of oil and 1,345 barrels of completion fluid in 168 hours. The oil produced is good quality, mature, 39 degrees API gravity light oil similar in composition to Eagle Ford Shale oils. Gas was also produced at 456 mcf per day on a 34/64ths of one inch choke
- The observations to date evidence a new oil discovery
- Very encouraging oil and gas production from a single stage frack

STRATIGRAPHY

Gulf Coast		Presidio Oil Project Subsurface
Series	Division or Group	
Gulf Cretaceous	Austin	San Carlos (Olmos)
		Austin Chalk age equivalent formation (called the Ojinaga)
	Eagle Ford	Upper Eagle Ford Shale
		Boquillas
	Comanche Cretaceous	Washita
Eagle Mt SS		
George Town		
Fredericksburg		Kiamichi
		Edwards
Trinity	Glen Rose	
	Hosston/Travis Peak	

OJINAGA FORMATION

New Oil Discovery - Ojinaga Formation

- High quality oil
- Typical fracked horizontal wells in west Texas have lateral lengths of between 5,000 feet (25 fracked stages) and 10,000 feet (50 fracked stages) and with each stage having a typical horizontal length of 200 feet
- Logs indicate that the lower interval of the Ojinaga Formation in the Quinn Creek 141 well is highly naturally fractured
- The lower bench of the Ojinaga Formation is approximately 330 feet thick with uniform rock characteristics. It is predominantly black shale with micro laminations of siltstone and fine carbonates
- The lower bench of the Ojinaga Formation shows well on both 2D & 3D seismic and is easily mapped
- Helios has no debt
- A fracked horizontal well of 7,000 feet in length (35 stages) would cost US\$7m

NEW OIL DISCOVERY

New Oil Discovery - Presidio Oil Project (onshore Texas, USA)

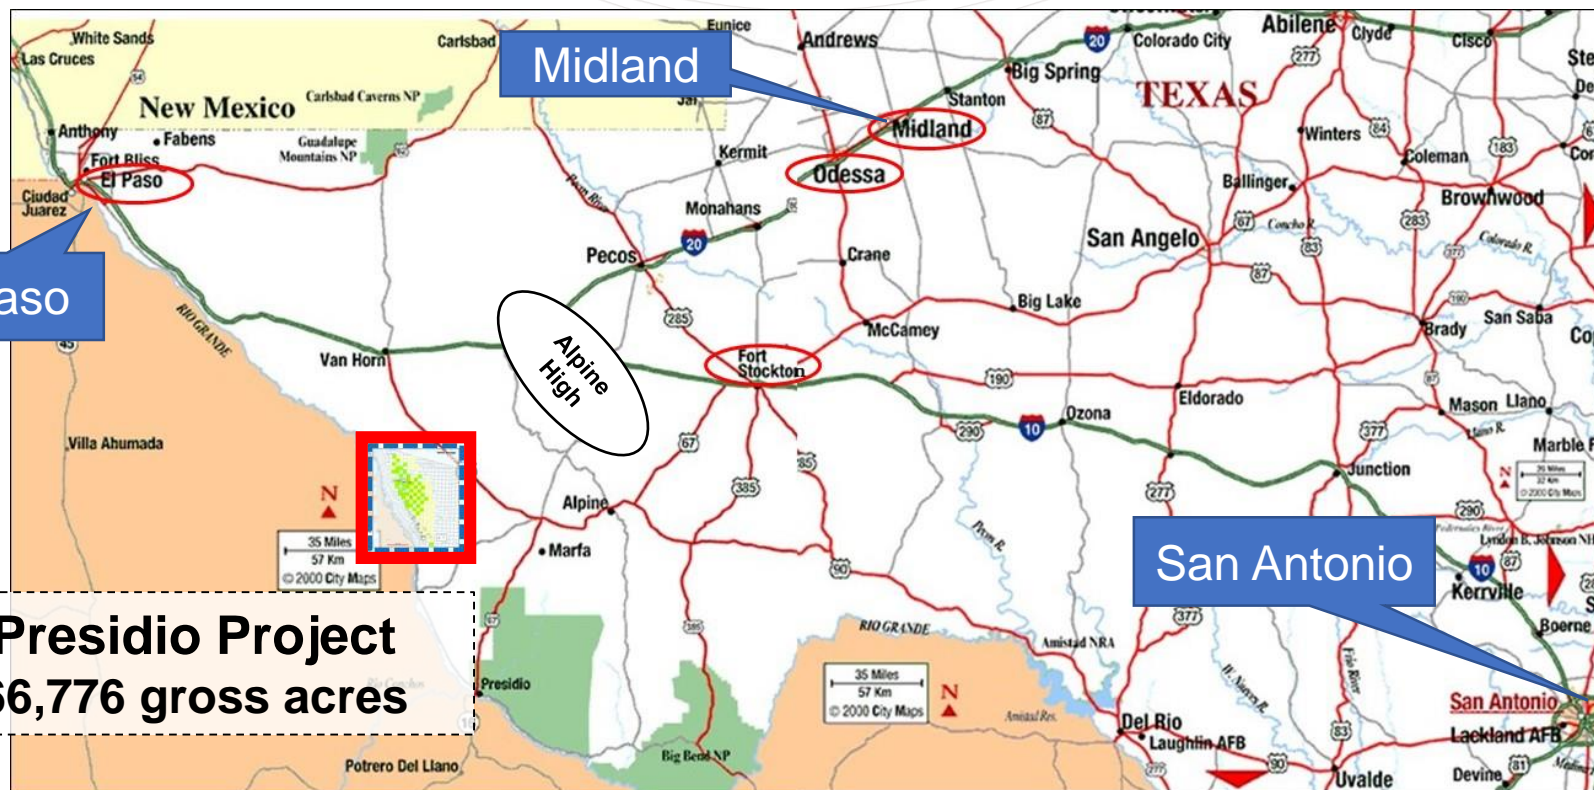

- The frack of the lower bench of the Ojinaga Formation in the Quinn Creek 141 well successfully injected 200,000 pounds of proppant (approximately 1,500 pounds of proppant per foot) and was deployed easily and without complications. At 1,500 pounds of proppant per foot this frack can be considered a “light frack”. Leading oil players in the Permian Basin in west Texas are commonly injecting 3,000 pounds of proppant per foot. Generally speaking, the greater the amount of proppant injected per foot (all other factors remaining equal) the higher the levels of 30 day initial oil production (30 Day IP) and estimated ultimate recovery (EUR) of oil
- The lower bench of the Ojinaga Shale Formation in the Quinn Creek 141 well has porosity predominately ranging between 4% to 12.5% and permeability up to 0.75 μ d (micro darcys). Analysis of the Quinn Creek 141 well and surrounding historical wells clearly shows that these porosity and permeability characteristics in Presidio County in the Ojinaga Shale Formation exceed the characteristics present in the Eagle Ford Shale in the Karnes Trough which is the premier sweet spot of the Eagle Ford Shale play

Excellent Infrastructure - West Texas, USA

- Access to the Quinn Mesa 113 and the Quinn Creek 141 well locations is provided by a 25 mile unsealed, formed road constructed by Helios that branches off the sealed US-90 highway which carries heavy truck and passenger vehicle traffic
- The Quinn Mesa 113 and the Quinn Creek 141 well locations have access to ample supplies of fresh water provided by local water wells drilled into shallow water aquifers
- The El Paso Oil Refinery located in El Paso, Texas has a processing capacity of 135,000 barrels of oil per day and is located 170 miles from the Presidio Oil Project. Crude oil is sold there by truck delivery
- The Presidio Oil Project is located 250 miles (or 5 hours by truck) from Midland, Texas which is the epicenter of the Permian Basin oil industry. All rigs, supplies and services required for the Presidio Oil Project are sourced from Midland, Texas. Oil production in the Permian Basin is nearing 3,200,000 bopd

PERMIAN BASIN – SUPPLY SOURCE

El Paso	3 hrs
Fort Stockton	2 hrs
Midland/Odessa	4 hrs

Houston	9 hrs
San Antonio	6 hrs
Abilene	5 hrs

LARGE LEASE HOLDING

66,776 Gross Acres

- Helios has been actively leasing in the Presidio Oil Project area
- Excluding the initial 6,400 acres (4,480 net acres) of the Presidio Oil Project in which Helios will earn a 70% WI upon completing the drilling of 3 wells, Helios has been actively leasing additional acres in close proximity to these initial 6,400 acres and now has a 70% WI in a further 26,096 acres. In addition, Helios has a 70% WI in a further 34,280 acres which have been placed under call option to lease. In total therefore, Helios has under contract a 70% WI in a total of 66,776 acres (46,743 net acres)
- Helios will acquire more leases in the Presidio Oil Project area in the near future
- Ojinaga Formation play area is large: 200,000 acres in size

NEW SEISMIC PROGRAM

New 2D Seismic Program

- Helios has to date shot, processed and interpreted a total of 17 miles of 2D seismic and 2 square miles of 3D seismic across the Presidio Oil Project. The Company's 3D seismic programme was acquired over 2 square miles covering the Quinn Creek 141 well and the Quinn Mesa 113 well and the area in between the 2 wells. Recent geological surface fieldwork has supported the current seismic interpretation and confirmed that an extensive area of Ojinaga Shale Formation and Eagle Ford Shale Formation are present throughout Helios' leases.
- The decision by Helios to focus its resources on its new oil discovery in the lower interval of the Ojinaga Formation has resulted in the decision to acquire further 2D seismic. Work has commenced on a further 21 miles of new 2D seismic. In addition, Helios has recently licensed 74 miles of 2D seismic acquired by a major oil company which covers acreage within the Ojinaga Shale Formation play area (200,000 acre play area) but which is currently unleased by Helios.
- Helios' 21 mile new 2D seismic program will be shot, processed and interpreted prior to the commencement of the drilling of the third well in the Presidio Oil Project.

QUINN CREEK 141 WELL – FRACK JOB

QUINN CREEK 141 WELL

Valley floor runs north-south

TRINITY OIL PROJECT

TRINITY COUNTY, TEXAS, USA

Trinity Oil Project (onshore unconventional oil project)

- The Trinity Oil Project is comprised of 3,128 net acres (100%WI) owned by Helios. The area is located about 100 miles northwest of Houston, and can be considered as a northeastward extension of the very well documented South Texas Eagle Ford trend.
- There has been increased interest and activity in the Woodbine, Eagle Ford, Buda, and Glen Rose formations (“Eaglebine” and “BudaRose”) in the Trinity, Houston and Walker county areas.
- Helios has the choice of developing the Trinity Oil Project with fracked horizontal wells into the Lower Woodbine, or vertical wells with individual completions in the target intervals. An additional alternative would be to drill vertical wells and then to comingling all the completed fracked intervals into a single production stream.
- Cost of a vertical, fracked well which comingles all the completed fracked intervals into a single production stream is US\$3.5m (100%WI).

EXPERIENCED OIL PEOPLE

Helios has an office in Houston, Texas and a strong and experienced team of oil people with extensive and successful experience in the oil business in Texas, USA.

Richard He

- Richard He is the Managing Director of Helios. He is based at the Company's Houston office.
- Richard He is an entrepreneur and venture capitalist in natural resources with a particular focus on oil and gas.
- Mr He was an investment banker and venture capitalist based in Shanghai and Beijing for more than 12 years with a capital markets practice and investment focus on Chinese equities listed on the major Chinese stock exchanges.
- Over the past 12 years, he has been based in Houston, Texas and has invested in and managed exploration and production shale plays in Texas, USA.
- Mr He is noted for his successful development of the Halliday Oil Field in the Woodbine tight sands play located in East Texas in which he was a joint venture participant. After drilling 14 successful fracked horizontal wells, the joint venture participants sold the Halliday Oil Field to Halcon Resources for US\$520m

EXPERIENCED OIL PEOPLE

Helios has a strong and experienced team of oil people with extensive and successful experience in the oil business in Texas, USA.

Peter Allchurch

- Geologist and Resource Venture Capitalist with 51 years' experience in Mineral and Petroleum Exploration, Development and Production.
- Co-founder of Helios and Top 5 shareholder in Helios
- Senior Technical Adviser to Helios
- Proven oil finder
- Has founded or co-founded a number of successful ASX listed companies in the oil and gas and mineral sectors including Cape Range Oil, Amity Oil, Aurora Oil & Gas Ltd and Eureka Energy Ltd (the latter two both in the Eagle Ford Shale in Texas).
- Along with Neville Henry introduced the Presidio Oil Project and the Trinity Oil Project to Helios

EXPERIENCED OIL PEOPLE

Helios has an office in Houston, Texas and a strong and experienced team of oil people with extensive and successful experience in the oil business in Texas, USA.

Neville Henry

- Born in Sydney.
- Geologist based in Houston, Texas for 26 years
- 44 years in the worldwide oil and gas industry
- He has directly led oil exploration teams responsible for oil and gas discoveries across 6 basins and over 4 countries for total discovered reserves of more than 4 billion barrels of oil
- Worked for Anadarko for 12 years most notably as International Exploration Manager and Worldwide Business Development Manager. During this 12 year period was part of the core team that built this non-US oil production business from 25,000 bopd to 400,000 bopd
- Neville has extensive operational experience in Texas and the USA in general
- Proven oil finder
- Along with Peter Allchurch introduced the Eagle Ford Shale oil project to Aurora Oil and Gas
- Along with Peter Allchurch introduced the Presidio Oil Project and the Trinity Oil Project to Helios

EXPERIENCED OIL PEOPLE

Helios has a strong and experienced team of oil people with extensive and successful experience in the oil business in Texas, USA.

Robert Bearden

- Non-executive director of Helios
- 25 years of senior management experience in oil and gas exploration, development and production throughout the Gulf of Mexico, Kazakhstan, Indonesia, China, Iraq and West Africa. Previously the President and CEO of the ASX listed public company Sino Gas & Energy Holdings (ASX Code: SEH) which under his leadership reached a market capitalization of \$375m.
- Prior to that role, he was the Operations Director for Addax (a Sinopec subsidiary) and the Production Excellence Manager for the Americas for Hess Corporation.
- Robert Bearden began his oil and gas career with Chevron where he worked for 27 years, and held positions including Managing Director Mid-Africa, Sr. Vice President EuroAsia, General Manager Tengizchevroil, and Operations Manager for the Gulf of Mexico.
- Robert Bearden has a Bachelor of Engineering degree from Texas A&M and a Master of Petroleum Engineering degree from Tulane University. He also holds a MBA from Purdue University and an International Masters in Management from ESCAP-EAP, Paris. Robert Bearden lives in Texas, USA and he is a petroleum engineer by profession.

EXPERIENCED OIL PEOPLE

Helios has a strong and experienced team of oil people with extensive and successful experience in the oil business in Texas, USA.

Hui Ye

- Chairman of Helios
- Largest shareholder of Helios (473,998,197 shares)(33% shareholding)
- Chairman and President of Beijing Chunhui Yuan Group which is a large private company with extensive interests in real estate, hotels, natural resources, education and entertainment.
- Hui Ye is a graduate of Shenzhen University in 1988.

CAPITAL RAISING

Use of Funds

- Drill Third Well into the Presidio Oil Project in Presidio County, Texas, USA
- Acquire more oil and gas leases in the Presidio Oil Project
- Shoot 21 miles of new 2D seismic and re-process and interpret 74 miles of recently licensed 2D seismic
- Working capital
