Nylon Tubular Webbing & Straps

1 23/32" Flat Nylon Webbing

Our 1 23/32" flat webbings are used for heavy duty uses such as harness construction and anchor slings. Available by the foot. Made of nylon. Made in the U.S.A.

NOTE: All webbing is manufactured with up to 3 pieces per spool. We cannot guarantee any specific continuous lengths

Order No.	Price	Color
060105-Blue	\$1.00	Blue
060105-BLACK	\$1.32	Black

1" Flat Woven Nylon Webbing

Type 9800 webbing is a flat, woven nylon webbing that is abrasion resistant and offers a high tensile strength. The increased strength is often preferred in harsh or abrasive environments for anchor building, hauling or making harnesses. Because Type 9800 is woven solid opposed to a tubular webbing, it can be more difficult to handle.

Made in the U.S.A.NOTE: All webbing is manufactured with up to 3 pieces per spool. We cannot guarantee any specific continuous lengths

Nylon Tubular Webbing & Straps

1" Nylon Tubular Webbing - By the Foot or 300' Spool

Nylon Tubular Webbing

Nylon tubular webbing is created by weaving nylon fibers into a tubular configuration and flattening the tube to form a reinforced double layer.

Tubular Webbing is widely used to tie up slings, runners, and harnesses. Rock N Rescue's nylon tubular webbing is manufactured to strict standards ensuring the highest quality.

Made in the U.S.A.

NOTE: All webbing is manufactured with up to 3 pieces per spool. We cannot guarantee specific continuous lengths

RNR, Webbing Kit

Standardized lengths of webbing used by FEMA Rescue Teams through-out the world. Assembled with 1" tubular nylon 4,000 lbf. webbing. Weight 2.4 lbs. Made in the U.S.A.

\$49⁰⁰

Rescue Rope & Rope Accessories

BOKAT, Rope Washer

Strong durable rope washer that is made of plastic. The sides hinge together with vinyl and is fastened with Velcro to adjust for varying rope diameters. The inside is an Astroturf brush for cleaning while flushing with water. Fits any standard garden hose. Made in the U.S.A.

\$42⁰⁰

BRIMAR, Rope Identification Markers

Write-on self-laminating rope markers. Write size, length, date and serial number on the white portion; clear laminating section wraps around the rope and label to protect the legend. Made in the U.S.A.

\$34⁰⁰

Rescue Rope & Rope Accessories

CLEAR HEAT SHRINK TUBE PER FOOT

Heat shrinkable tubing for marking and finishing off rope ends. Slip over end of rope and apply hot air or infrared heat source of 275 F. Clear tubing will shrink tightly around rope and marker. Sold in whole foot increments. Available in 3/8" and 3/4". Will shrink to approximately 50% of its original diameter. Weight 0.5 oz. per foot. Made in the U.S.A.

Order No.	Price	Diameter
060802	\$1.18	3/4 in.
060803	\$0.92	3/8 in

Hand Held Hot Knife

Cuts and seals synthetic rope in seconds. The best way to prevent nylon rope from fraying is to melt the ends, but everyone who has done it knows it's a slow, messy, smelly operation that often results in flaming drips and burnt fingers. Instead use this handheld heat gun - it cuts and seals the ends of synthetic rope in one quick operation. Made outside the U.S.A.

Order No.	Price	Choose Option
S6805	\$7.75	Replacement Blade
S6801	\$57.50	Hot Knife

Rescue Rope & Rope Accessories

MDR, Whip-End Dip

A water based liquid vinyl compound which is applied to the ends of ropes. It seals the ends of the rope and prevents the ends from unraveling and fraying. Your choice of white or clear can be used to code ropes by length, size, date in service or whatever type of coding is desired. Made in the U.S.A.

Rescue Rope & Rope Accessories

New England 1/2" KMIII Safety Rope - Short Sale

Great Prices on short lengths of rope! Regular price \$1.28 (White) and \$1.46 (Colors) per foot - Sale price \$0.80 (White) and \$1.00 (Colors) per foot

KM-III's unique polyester sheath differentiates KM-III from other static ropes. The polyester sheath is balanced with a nylon core to limit rotation, bouncing, and stretch with exceptional UV resistance. KM-III is NFPA and CE approved, and comes with an NFPA certification tag and CE labels. This is one of the most durable static ropes available with the handling and knotability you expect from New England (TEUFELBERGER). The sheath of the KMIII is made with a 32 carrier sheath design. 32 carriers provide a middle ground between a stiffer, durable 16 carrier design but its harder to work with and a 48 carrier design that is softer and easier to work with but is not as durable. KMIII combines the better characteristics of both which allows for an incredibly smooth sheath, higher tensile strengths, and superior handling characteristics.

Features

- 32-Strand sheath for optimum sheath / core ratio
- Polyester over Nylon with a balanced torque free construction
- excellent handling and knot holding characteristics
- high abrasion resistance
- excellent UV protection

Rescue Rope & Rope Accessories

Rescue Rope & Rope Accessories

Petzl Axis 11 mm with sewn termination

A low stretch kernmantel rope with sewn termination and good handling, for work at height. The AXIS 11 mm low stretch kernmantel rope with sewn termination is designed for work at height. The standard diameter ensures a good grip for easier handling. The EverFlex construction guarantees great flexibility and consistent performance over time. The sewn termination with protective sheath helps keep the connector in position and facilitates handling. It is suitable for use with an ASAP mobile fall arrester, or in a rescue kit with an I'D S descender.

Features:

- Standard diameter ensures a good grip for easier handling
- Consistent performance over time:- EverFlex construction with nylon core and polyester sheath, with specific weave- this construction ensures great flexibility over time, under any conditions (water, dust, mud...), which allows it to maintain excellent handling and optimal functioning with devices
- Comes with sewn termination that allows it to meet the EN 353-2 standard for use with an ASAP mobile fall arrester, or to be part of a rescue kit that includes an I'D S descender. This termination has a protective sheath that keeps the carabiner in position and facilitates handling
- Standard lengths - 10 Meters (32.8 ft.), 20 Meters (65.2 ft.), (30 M (98 ft.), 40 Meters (131.2 ft.), 50 Meters (164 ft) and 60 Meters (196 ft).

Rescue Rope & Rope Accessories

Petzl Mambo 10.1 mm Dynamic

Dynamic rope for progression using climbing techniques. The 10.1 mm diameter MAMBO dynamic rope is designed for work at height professionals that use climbing techniques for progression. The thick sheath improves abrasion resistance. Dynamic rope limits the impact transmitted to the user in case of a fall.

Order No.	Price	Length

R32AY W30	\$99.95	30 Meter

Rescue Rope & Rope Accessories

Petzl Parallel 10.5 mm Rope Access Rope

Semi-static rope for rope access, with a thin diameter to ensure very good performance in terms of flexibility and weight. PARALLEL 10.5 mm has low stretch when under tension, increasing efficiency at the start of a rope ascent. Its EverFlex construction guarantees great flexibility and consistent performance over time. Rope available in two colors and four lengths.

Features:

- Thin diameter ensures very good performance in terms of flexibility and weight
- Low stretch when loaded, increasing efficiency at the start of a rope ascent
- Consistent performance over time:
- EverFlex construction with nylon core and polyester sheath, with specific weave - this construction ensures great flexibility over time, under any conditions (water, dust, mud...), which allows it to maintain excellent handling and optimal functioning with devices
- Available in two colors for easy differentiation of working rope, safety rope, and common access: White and Black,
- Standard lengths: 50 ft. (15.5 Meters), 100 ft. (30.5 meters), 164 ft. (50 Meters), 328 ft.(100 Meters), 656 ft. (200 Meters) and 1,640 ft. (500 Meters).

Rescue Rope & Rope Accessories

Petzl Ray 12 mm with sewn termination

The RAY 12 mm static rope with sewn termination is designed for use with an ASAP (international version) or ASAP LOCK mobile fall arrester. The standard diameter ensures a good grip for easier handling. It has low stretch when put under tension, allowing it to meet the requirements of U.S. fall protection standards. The sewn termination with protective sheath helps keep the connector in position and facilitates handling. Rope available in five lengths.

Features:

- Low stretch rope that meets the requirements of the ANSI Z359.15 standard when used with an ASAP (internationalVersion) or ASAP LOCK mobile fall arrester
- 100 % polyester manufacturing ensures great flexibility over time under any conditions (water, dust, mud...), conserving excellent long-term handling
- Rope with a sewn termination: the termination has a protective sheath that keeps the connector in position and facilitates handling
- Standard lengths: 25, 50, 75, 100 and 200 feet

R-N-R, Utility Rope - 3/8" and 1/2" Shorts

Utility rope is a non-rated affordable option for using as a general yard rope. Utility rope is manufactured using excess core strands from other products including static ropes, dynamic ropes, and polypropylene ropes. Because of the assortment of fibers that this rope has, it does not carry an MBS rating and would best be used for hauling tools or as lashing straps. WARNING: Not for rappelling or life safety applications. Made in the U.S.A.

Rescue Rope & Rope Accessories

RNR Poseidon Series Lifeline - 1/2" Short Sale

Great pricing on short lengths of 1/2 in. rope! Regular Price \$1.28 per foot - Sale Price \$0.80 - \$1.00 per foot

****This item does not qualify for free shipping****

Rock-N-Rescue and New England Ropes have teamed up to produce an exceptional static rope for rappelling, caving, rescue, fixed-rope applications, hauling, and life-safety applications.

R-N-R Lifeline's unique polyester sheath differentiates it from other static rescue ropes. The polyester sheath is balanced with a nylon core to limit rotation, bouncing, and stretch with exceptional UV resistance. Poseidon Series Lifeline is NFPA and CE approved, and comes with an NFPA certification tag and CE labels. This is one of the most durable static ropes available with the handling and knotability you expect from Rock-N-Rescue. The sheath of the rope is made with a 32 carrier sheath design. 32 carriers provide a middle ground between a stiffer, durable 16 carrier design but is harder to work with and a 48 carrier design that is softer and easier to work with but is not as durable.

R-N-R Lifeline combines the better characteristics of both which allows for an incredibly smooth sheath, higher tensile strengths, and superior handling characteristics.

FEATURES:

- 32-Strand sheath for optimum sheath / core ratio
- Polyester over Nylon with a balanced torque free construction
- excellent handling and knot holding characteristics
- high abrasion resistance
- excellent UV protection

Rescue Rope & Rope Accessories

RNR 8 mm Nylon Personal Escape Rope

Developed for Rock-N-Rescue by Sterling Rope, Nylon Personal Escape Rope is the most cost effective solution for those who want the ability to escape from a structure without the higher cost of a Technora or Aramid fiber based rope. Even though the melting point of nylon fibers is lower than the more expensive fibers, recent tests done with a remote anchor that was exposed to 635 degrees, the rope did not fail in any of the tests conducted before 9 minutes. Nylon fiber makes a lightweight, compact more supple rope that is easier to stuff and use. It also works great with the F4 and new FCX escape devices that are on the market today.

Although we hope that you never have to actually use this item in an emergency, rest assured that if the need to use it arises in an emergency, this product is backed by years of research and development, testing and actual field work. Color: Neon Green with blue tracers. Made in USA.

RNR Poseidon FireTech 2 Escape Rope

Developed by Sterling Rope for Rock-N-Rescue, the new FireTech2 is an improved version of the popular FireTech, the escape rope choice of the FDNY personal escape systems. FireTech2 is now slightly lighter weight and has a softer hand to make it easier to use with the F4 and the new FCX descent devices. Although we hope that you never have to actually use this item in an emergency, rest assured that if the need to use it arises in an emergency, this product is backed by years of research and development, testing and actual field work. The rope can be purchased separately or with one of three different anchor hooks sewn on. The ropes with sewn anchor hooks each come with 50 ft. of rope. 7.5mm high heat resistant, 100% Technora kernmantle construction. Meets NFPA 1983 for Escape Rope. Made in the U.S.A.

Rescue Rope & Rope Accessories

RNR, Trident Series H2O Line

R-N-R's Trident Series 5/16" H2O Lines feature a bright yellow polypropylene sheath for high visibility, blue tracer stripes and nylon core for strength. The 3/8" Trident Series H2O Lines feature a bright yellow polypropylene sheath for high visibility, red tracer stripes and nylon DryCore for strength and minimum moisture absorption. The 3/8" is also certified to the NFPA Throwline standard. The supple nature of these high floatation ropes make for easy stuffing and quicker deployment during rescues. Ideal for use in throw bags and as swimmer tether lines. Trident Series 7/16" H2O Lines feature a double-braided high tenacity polypropylene construction for high strength, great handling and maximum floatation. The sheath is bright yellow polypropylene and it's tracer stripes are red. The 7/16" H2O Line provides better abrasion resistance and a larger diameter for a better grip with a gloved hand and is the Ideal choice for ice rescue due to its higher strength and supple hand.

SMC Endeez Rope End Indicators

The Endeez rope end-icator was designed to aid climbers with a quick physical means of identifying their rope ends as they are rappelling, belaying, climbing or handling rope. Simply insert and thread the Endeez on your rope ends and secure them as directed. Ideal for use as a back-up knot while climbing, providing quick identification of rope ends or as a physical marker while working on or with rope the Endeez provide users with exceptional performance in the simplest form as a physical link between the rope and the climber. In some limited cases Endeez may stop the movement of rope through a device or knot, but that feature can not be construed as a means of catching a fall or as fall protection. Sold in packs of 2 (two) - one each color per pack. Made in the U.S.A.

SMC Spire - Multi-pitch Belay & Rappel Device

The Spire is ideal for multi-pitch climbing, rappelling, and belaying off an anchor or directly off your climbing harness. Designed from the ground up to assure climbers have the most reliable and durable device on the market. The Spire excels at autoblocks, belaying a leader and paying out rope quickly.

- Tapered slots allow for ease of use when paying out rope and maximize control when lowering or rappelling.
- Can be set up as an auto-block device when you're belaying 1 or 2 seconding climbers.
- Unique and Intuitive Brake-Assist Mode featuring release hole designed to allow a carabiner to be used as a lever. Lower a seconding climber is quick, simple and secure.
- Design provides great control with many rope diameters; can handle ropes sizes from 7.5 - 10.7mm in diameter
- Machined from 7075-T6 aluminum and anodized to minimize weight and maximize performance.
- Double-slot design allows you to feed single or double ropes smoothly

Petzl Axis 11 mm with sewn termination

A low stretch kernmantel rope with sewn termination and good handling, for work at height. The AXIS 11 mm low stretch kernmantel rope with sewn termination is designed for work at height. The standard diameter ensures a good grip for easier handling. The EverFlex construction guarantees great flexibility and consistent performance over time. The sewn termination with protective sheath helps keep the connector in position and facilitates handling. It is suitable for use with an ASAP mobile fall arrester, or in a rescue kit with an I'D S descender.

Features:

- Standard diameter ensures a good grip for easier handling
- Consistent performance over time:- EverFlex construction with nylon core and polyester sheath, with specific weave- this construction ensures great flexibility over time, under any conditions (water, dust, mud...), which allows it to maintain excellent handling and optimal functioning with devices
- Comes with sewn termination that allows it to meet the EN 353-2 standard for use with an ASAP mobile fall arrester, or to be part of a rescue kit that includes an I'D S descender. This termination has a protective sheath that keeps the carabiner in position and facilitates handling
- Standard lengths - 10 Meters (32.8 ft.), 20 Meters (65.2 ft.), (30 M (98 ft.), 40 Meters (131.2 ft.), 50 Meters (164 ft) and 60 Meters (196 ft).

Petzl Parallel 10.5 mm Rope Access Rope

Semi-static rope for rope access, with a thin diameter to ensure very good performance in terms of flexibility and weight. PARALLEL 10.5 mm has low stretch when under tension, increasing efficiency at the start of a rope ascent. Its EverFlex construction guarantees great flexibility and consistent performance over time. Rope available in two colors and four lengths.

Features:

- Thin diameter ensures very good performance in terms of flexibility and weight
- Low stretch when loaded, increasing efficiency at the start of a rope ascent
- Consistent performance over time:
- EverFlex construction with nylon core and polyester sheath, with specific weave - this construction ensures great flexibility over time, under any conditions (water, dust, mud...), which allows it to maintain excellent handling and optimal functioning with devices
- Available in two colors for easy differentiation of working rope, safety rope, and common access: White and Black,
- Standard lengths: 50 ft. (15.5 Meters), 100 ft. (30.5 meters), 164 ft. (50 Meters), 328 ft.(100 Meters), 656 ft. (200 Meters) and 1,640 ft. (500 Meters).

DMM Revolver Rig

A connector with an integrated pulley sheave. It features a high efficiency roller bearing sheave(s), threaded removable captive bar and a full strength textile friendly becket.

The uniquely profiled spine and captive bar aid in maintaining correct orientation.

The design of the Revolver Rig is such that when using a connector attached to the becket any friction between the connector and rope is minimised.

PRODUCT FEATURES

- Large sheave tread diameter for large bend radius
- High efficiency roller bearings
- Full strength becket accepts most connectors or direct textile connection
- Removable captive bar
- DMM iD optional
- Keylock nose for snag free operation
- Uniquely profiled spine to aid correct orientation

Rescue Rope & Rope Accessories, Fire Escape Rope

RNR 8 mm Nylon Personal Escape Rope

Developed for Rock-N-Rescue by Sterling Rope, Nylon Personal Escape Rope is the most cost effective solution for those who want the ability to escape from a structure without the higher cost of a Technora or Aramid fiber based rope. Even though the melting point of nylon fibers is lower than the more expensive fibers, recent tests done with a remote anchor that was exposed to 635 degrees, the rope did not fail in any of the tests conducted before 9 minutes. Nylon fiber makes a lightweight, compact more supple rope that is easier to stuff and use. It also works great with the F4 and new FCX escape devices that are on the market today. Although we hope that you never have to actually use this item in an emergency, rest assured that if the need to use it arises in an emergency, this product is backed by years of research and development, testing and actual field work. Color: Neon Green with blue tracers. Made in USA.

Rescue Rope & Rope Accessories, Fire Escape Rope

RNR Poseidon FireTech 2 Escape Rope

Developed by Sterling Rope for Rock-N-Rescue, the new FireTech2 is an improved version of the popular FireTech, the escape rope choice of the FDNY personal escape systems. FireTech2 is now slightly lighter weight and has a softer hand to make it easier to use with the F4 and the new FCX descent devices. Although we hope that you never have to actually use this item in an emergency, rest assured that if the need to use it arises in an emergency, this product is backed by years of research and development, testing and actual field work. The rope can be purchased separately or with one of three different anchor hooks sewn on. The ropes with sewn anchor hooks each come with 50 ft. of rope. 7.5mm high heat resistant, 100% Technora kernmantle construction. Meets NFPA 1983 for Escape Rope. Made in the U.S.A.

Escape Rope

RNR, Poseidon Safe Tech Escape Rope

Developed for Rock-N-Rescue by Sterling Rope, Safe Tech Escape Rope is a more cost effective solution for those who want the high heat resistance of an all Technora escape rope without the higher cost. Safe Tech combines the high heat resistance of Technora into it's sheath with the strength and better elongation properties of a nylon core into a single, more cost effective package. Although we hope that you never have to actually use this item in an emergency, rest assured that if the need to use it arises in an emergency, this product is backed by years of research and development, testing and actual field work. The rope can be purchased separately or with one of three different anchor hooks sewn on. The ropes with sewn anchor hooks each come with 50 ft. of rope. Meets NFPA 1983 for Escape Rope. DMM Revolver Rig

A connector with an integrated pulley sheave. It features a high efficiency roller bearing sheave(s), threaded removable captive bar and a full strength textile friendly becket.

The uniquely profiled spine and captive bar aid in maintaining correct orientation.

The design of the Revolver Rig is such that when using a connector attached to the becket any friction between the connector and rope is minimised.

PRODUCT FEATURES

- Large sheave tread diameter for large bend radius
- High efficiency roller bearings
- Full strength becket accepts most connectors or direct textile connection
- Removable captive bar
- DMM iD optional
- Keylock nose for snag free operation
- Uniquely profiled spine to aid correct orientation

Rescue Rope & Rope Accessories, Rope Accessories

Hand Held Hot Knife

Cuts and seals synthetic rope in seconds. The best way to prevent nylon rope from fraying is to melt the ends, but everyone who has done it knows it's a slow, messy, smelly operation that often results in flaming drips and burnt fingers. Instead use this handheld heat gun - it cuts and seals the ends of synthetic rope in one quick operation. Made outside the U.S.A.

MDR, Whip-End Dip

A water based liquid vinyl compound which is applied to the ends of ropes. It seals the ends of the rope and prevents the ends from unraveling and fraying. Your choice of white or clear can be used to code ropes by length, size, date in service or whatever type of coding is desired. Made in the U.S.A.

Rope & Cordage Meter

A simple, accurate device for measuring all rope and cordage from 5/32" up to 3/4" in diameter. Weight 8 lbs. Made in the U.S.A.

\$314⁰⁰

SMC Endeez Rope End Indicators

The Endeez rope end-icator was designed to aid climbers with a quick physical means of identifying their rope ends as they are rappelling, belaying, climbing or handling rope. Simply insert and thread the Endeez on your rope ends and secure them as directed. Ideal for use as a back-up knot while climbing, providing quick identification of rope ends or as a physical marker while working on or with rope the Endeez provide users with exceptional performance in the simplest form as a physical link between the rope and the climber. In some limited cases Endeez may stop the movement of rope through a device or knot, but that feature can not be construed as a means of catching a fall or as fall protection. Sold in packs of 2 (two) - one each color per pack. Made in the U.S.A.

Teufelberger Scrubba Rope Soap

TEUFELBERGER has developed a detergent specifically formulated for fiber ropes that extends the service life without compromising strength.

In 2013, TEUFELBERGER engineers launched the project “Deliberate Rope Damage in Fiber Ropes”, testing and analyzing the impacts of various mechanisms of damage to fiber ropes. The results of the analyses enable us to understand, among others, the effects of washing on the service life of ropes. For you as a climber, the topic of how to wash a fiber rope and use detergents is of particular interest in regards to the integrity of your rope and your safety. The solution is SCRUBBA!

SCRUBBA is their easy to use rope detergent specifically formulated to clean ropes effectively and gently.

The test results: [Teufelberger Scrubba Tests](#)

New England 1/2" KMIII Safety Rope - Short Sale

Great Prices on short lengths of rope! Regular price \$1.28 (White) and \$1.46 (Colors) per foot - Sale price \$0.80 (White) and \$1.00 (Colors) per foot

KM-III's unique polyester sheath differentiates KM-III from other static ropes. The polyester sheath is balanced with a nylon core to limit rotation, bouncing, and stretch with exceptional UV resistance. KM-III is NFPA and CE approved, and comes with an NFPA certification tag and CE labels. This is one of the most durable static ropes available with the handling and knotability you expect from New England (TEUFELBERGER). The sheath of the KMIII is made with a 32 carrier sheath design. 32 carriers provide a middle ground between a stiffer, durable 16 carrier design but its harder to work with and a 48 carrier design that is softer and easier to work with but is not as durable. KMIII combines the better characteristics of both which allows for an incredibly smooth sheath, higher tensile strengths, and superior handling characteristics.

Features

32-Strand sheath for optimum sheath / core ratio

Polyester over Nylon with a balanced torque free construction

excellent handling and knot holding characteristics

high abrasion resistance

excellent UV protection

Kernmantle Rope

Petzl Axis 11 mm with sewn termination

A low stretch kernmantle rope with sewn termination and good handling, for work at height. The AXIS 11 mm low stretch kernmantle rope with sewn termination is designed for work at height. The standard diameter ensures a good grip for easier handling. The EverFlex construction guarantees great flexibility and consistent performance over time. The sewn termination with protective sheath helps keep the connector in position and facilitates handling. It is suitable for use with an ASAP mobile fall arrester, or in a rescue kit with an I'D S descender.

Features:

- Standard diameter ensures a good grip for easier handling
- Consistent performance over time:- EverFlex construction with nylon core and polyester sheath, with specific weave- this construction ensures great flexibility over time, under any conditions (water, dust, mud...), which allows it to maintain excellent handling and optimal functioning with devices
- Comes with sewn termination that allows it to meet the EN 353-2 standard for use with an ASAP mobile fall arrester, or to be part of a rescue kit that includes an I'D S descender. This termination has a protective sheath that keeps the carabiner in position and facilitates handling
- Standard lengths - 10 Meters (32.8 ft.), 20 Meters (65.2 ft.), (30 M (98 ft.), 40 Meters (131.2 ft.), 50 Meters (164 ft) and 60 Meters (196 ft).

Rescue Rope & Rope Accessories, Static Kernmantle Rope

Petzl Parallel 10.5 mm Rope Access Rope

Semi-static rope for rope access, with a thin diameter to ensure very good performance in terms of flexibility and weight. PARALLEL 10.5 mm has low stretch when under tension, increasing efficiency at the start of a rope ascent. Its EverFlex construction guarantees great flexibility and consistent performance over time. Rope available in two colors and four lengths.

Features:

- Thin diameter ensures very good performance in terms of flexibility and weight
- Low stretch when loaded, increasing efficiency at the start of a rope ascent
- Consistent performance over time:
- EverFlex construction with nylon core and polyester sheath, with specific weave - this construction ensures great flexibility over time, under any conditions (water, dust, mud...), which allows it to maintain excellent handling and optimal functioning with devices
- Available in two colors for easy differentiation of working rope, safety rope, and common access: White and Black,
- Standard lengths: 50 ft. (15.5 Meters), 100 ft. (30.5 meters), 164 ft. (50 Meters), 328 ft.(100 Meters), 656 ft. (200 Meters) and 1,640 ft. (500 Meters).

Rescue Rope & Rope Accessories, Static Kernmantle Rope

Petzl Ray 12 mm with sewn termination

The RAY 12 mm static rope with sewn termination is designed for use with an ASAP (international version) or ASAP LOCK mobile fall arrester. The standard diameter ensures a good grip for easier handling. It has low stretch when put under tension, allowing it to meet the requirements of U.S. fall protection standards. The sewn termination with protective sheath helps keep the connector in position and facilitates handling. Rope available in five lengths.

Features:

- Low stretch rope that meets the requirements of the ANSI Z359.15 standard when used with an ASAP (internationalVersion) or ASAP LOCK mobile fall arrester
- 100 % polyester manufacturing ensures great flexibility over time under any conditions (water, dust, mud...), conserving excellent long-term handling
- Rope with a sewn termination: the termination has a protective sheath that keeps the connector in position and facilitates handling
- Standard lengths: 25, 50, 75, 100 and 200 feet

Rescue Rope & Rope Accessories, Static Kernmantle Rope

RNR Poseidon Series Lifeline - 1/2" Short Sale

Great pricing on short lengths of 1/2 in. rope! Regular Price \$1.28 per foot - Sale Price \$0.80 - \$1.00 per foot

****This item does not qualify for free shipping****

Rock-N-Rescue and New England Ropes have teamed up to produce an exceptional static rope for rappelling, caving, rescue, fixed-rope applications, hauling, and life-safety applications.

R-N-R Lifeline's unique polyester sheath differentiates it from other static rescue ropes. The polyester sheath is balanced with a nylon core to limit rotation, bouncing, and stretch with exceptional UV resistance. Poseidon Series Lifeline is NFPA and CE approved, and comes with an NFPA certification tag and CE labels. This is one of the most durable static ropes available with the handling and knotability you expect from Rock-N-Rescue. The sheath of the rope is made with a 32 carrier sheath design. 32 carriers provide a middle ground between a stiffer, durable 16 carrier design but is harder to work with and a 48 carrier design that is softer and easier to work with but is not as durable.

R-N-R Lifeline combines the better characteristics of both which allows for an incredibly smooth sheath, higher tensile strengths, and superior handling characteristics.

FEATURES:

- 32-Strand sheath for optimum sheath / core ratio
- Polyester over Nylon with a balanced torque free construction
- excellent handling and knot holding characteristics
- high abrasion resistance
- excellent UV protection

Rescue Rope & Rope Accessories, Static Kernmantle Rope, Petzl Rope

Petzl Axis 11 mm with sewn termination

A low stretch kernmantle rope with sewn termination and good handling, for work at height. The AXIS 11 mm low stretch kernmantle rope with sewn termination is designed for work at height. The standard diameter ensures a good grip for easier handling. The EverFlex construction guarantees great flexibility and consistent performance over time. The sewn termination with protective sheath helps keep the connector in position and facilitates handling. It is suitable for use with an ASAP mobile fall arrester, or in a rescue kit with an I'D S descender.

Features:

- Standard diameter ensures a good grip for easier handling
- Consistent performance over time:- EverFlex construction with nylon core and polyester sheath, with specific weave- this construction ensures great flexibility over time, under any conditions (water, dust, mud...), which allows it to maintain excellent handling and optimal functioning with devices
- Comes with sewn termination that allows it to meet the EN 353-2 standard for use with an ASAP mobile fall arrester, or to be part of a rescue kit that includes an I'D S descender. This termination has a protective sheath that keeps the carabiner in position and facilitates handling
- Standard lengths - 10 Meters (32.8 ft.), 20 Meters (65.2 ft.), (30 M (98 ft.), 40 Meters (131.2 ft.), 50 Meters (164 ft) and 60 Meters (196 ft).

Rescue Rope & Rope Accessories, Static Kernmantle Rope, Petzl Rope

Petzl Parallel 10.5 mm Rope Access Rope

Semi-static rope for rope access, with a thin diameter to ensure very good performance in terms of flexibility and weight. PARALLEL 10.5 mm has low stretch when under tension, increasing efficiency at the start of a rope ascent. Its EverFlex construction guarantees great flexibility and consistent performance over time. Rope available in two colors and four lengths.

Features:

- Thin diameter ensures very good performance in terms of flexibility and weight
- Low stretch when loaded, increasing efficiency at the start of a rope ascent
- Consistent performance over time:
- EverFlex construction with nylon core and polyester sheath, with specific weave - this construction ensures great flexibility over time, under any conditions (water, dust, mud...), which allows it to maintain excellent handling and optimal functioning with devices
- Available in two colors for easy differentiation of working rope, safety rope, and common access: White and Black,
- Standard lengths: 50 ft. (15.5 Meters), 100 ft. (30.5 meters), 164 ft. (50 Meters), 328 ft.(100 Meters), 656 ft. (200 Meters) and 1,640 ft. (500 Meters).

New England 1/2" KMIII Safety Rope - Short Sale

Great Prices on short lengths of rope! Regular price \$1.28 (White) and \$1.46 (Colors) per foot - Sale price \$0.80 (White) and \$1.00 (Colors) per foot

KM-III's unique polyester sheath differentiates KM-III from other static ropes. The polyester sheath is balanced with a nylon core to limit rotation, bouncing, and stretch with exceptional UV resistance. KM-III is NFPA and CE approved, and comes with an NFPA certification tag and CE labels. This is one of the most durable static ropes available with the handling and knotability you expect from New England (TEUFELBERGER). The sheath of the KMIII is made with a 32 carrier sheath design. 32 carriers provide a middle ground between a stiffer, durable 16 carrier design but its harder to work with and a 48 carrier design that is softer and easier to work with but is not as durable. KMIII combines the better characteristics of both which allows for an incredibly smooth sheath, higher tensile strengths, and superior handling characteristics.

Features

- 32-Strand sheath for optimum sheath / core ratio
- Polyester over Nylon with a balanced torque free construction
- excellent handling and knot holding characteristics
- high abrasion resistance
- excellent UV protection

Rescue Rope & Rope Accessories, Static Kernmantle Rope, R-N-R Poseidon Series Lifeline

RNR Poseidon Series Lifeline - 1/2" Short Sale

Great pricing on short lengths of 1/2 in. rope! Regular Price \$1.28 per foot - Sale Price \$0.80 - \$1.00 per foot

This item does not qualify for free shipping

Rock-N-Rescue and New England Ropes have teamed up to produce an exceptional static rope for rappelling, caving, rescue, fixed-rope applications, hauling, and life-safety applications.

R-N-R Lifeline's unique polyester sheath differentiates it from other static rescue ropes. The polyester sheath is balanced with a nylon core to limit rotation, bouncing, and stretch with exceptional UV resistance. Poseidon Series Lifeline is NFPA and CE approved, and comes with an NFPA certification tag and CE labels. This is one of the most durable static ropes available with the handling and knotability you expect from Rock-N-Rescue. The sheath of the rope is made with a 32 carrier sheath design. 32 carriers provide a middle ground between a stiffer, durable 16 carrier design but is harder to work with and a 48 carrier design that is softer and easier to work with but is not as durable.

R-N-R Lifeline combines the better characteristics of both which allows for an incredibly smooth sheath, higher tensile strengths, and superior handling characteristics.

FEATURES:

- 32-Strand sheath for optimum sheath / core ratio
- Polyester over Nylon with a balanced torque free construction
- excellent handling and knot holding characteristics
- high abrasion resistance
- excellent UV protection

Rescue Rope & Rope Accessories, Static Kernmantle Rope, R-N-R Poseidon Series Lifeline

Rescue Rope & Rope Accessories, Utility Rope

R-N-R, Utility Rope - 3/8" and 1/2" Shorts

Utility rope is a non-rated affordable option for using as a general yard rope. Utility rope is manufactured using excess core strands from other products including static ropes, dynamic ropes, and polypropylene ropes. Because of the assortment of fibers that this rope has, it does not carry an MBS rating and would best be used for hauling tools or as lashing straps. **WARNING:** Not for rappelling or life safety applications. Made in the U.S.A.

Order No.	Price	Length	Diameter

TEUFELBERGER MULTILINE II RIGGING ROPE - 1/2" and 5/8"

The Multiline II rigging line is a 3-strand composite rope, constructed by twisting three strands of a blend of polyester and filaments around a polyolefin core.

The polyolefin core keeps the rope firm and round without adding weight, which improves abrasion resistance and handling. The blend of polyester and filaments gives our Multiline II its characteristic fuzzy feel and makes it easier to grip, even when wet. Also, Multiline II provides the most consistent supple feel over time of any commercially available twisted rope. It is available in 1/2" diameter and 5/8" diameter

Multiline II is easily identified by its familiar two orange markers.

The benefits of Multiline II are:

- Good grip and knot holding ability, even when wet
- Excellent knot holding ability and good handling
- Great ease of splicing
- Consistently supple feel throughout the service life of the rope
- Polyolefin keeps line diameter up without adding weight.
- Very little water absorption
- Multiline II will not break down from UV exposure
- Soft, spun polyester is added to the surface for better grip and chafe protection

Rescue Rope & Rope Accessories, Water
Rescue Rope

RNR, Trident Series H2O Line

R-N-R's Trident Series 5/16" H2O Lines feature a bright yellow polypropylene sheath for high visibility, blue tracer stripes and nylon core for strength. The 3/8" Trident Series H2O Lines feature a bright yellow polypropylene sheath for high visibility, red tracer stripes and nylon DryCore for strength and minimum moisture absorption. The 3/8" is also certified to the NFPA Throwline standard. The supple nature of these high floatation ropes make for easy stuffing and quicker deployment during rescues. Ideal for use in throw bags and as swimmer tether lines. Trident Series 7/16" H2O Lines feature a double-braided high tenacity polypropylene construction for high strength, great handling and maximum floatation. The sheath is bright yellow polypropylene and it's tracer stripes are red. The 7/16" H2O Line provides better abrasion resistance and a larger diameter for a better grip with a gloved hand and is the Ideal choice for ice rescue due to its higher strength and supple hand.

Rope Storage and Protection

AQUAPAC, VHF Pro Radio Case - Small

Suitable for both left- and right-hand antenna radio the PRO VHF Radio cases are made of military specification reinforced vinyl material ideal for professional and rigorous uses. Guaranteed submersible to 30'. Supplied with a 3-way harness so you can wear your radio on your chest keeping your hands free. Made outside the U.S.A.

Features:

- The clever antenna design not only fits L- and R-handed radios but also creates an emergency grab handle.
- You can use your radio normally through the case, it doesn't interfere with sound or radio signals.
- Also protects from dust, dirt and sand.
- Like most of our cases it'll float if you drop it in the drink.
- The seams are high-frequency welded to form a super-strong bond.
- The Aquaclip® (a patented, ultra-secure, rustproof, injection-molded plastic seal) opens and closes with a simple twist of two levers, and everything stays in one piece even when open.

\$62⁷⁵

Rope Storage and Protection

RNR, Grand Vinyl Rope Bag

The R-N-R Vinyl Coated Polyester rope bag was designed to be a long lasting, durable bag that holds up to 600' of 1/2" (13mm) rope. The redesigned bag has a wider opening which makes it easier to stuff. Each bag comes with a draw string top closure. Padded shoulder straps offer more comfort when carrying the bag. Top carrying handles for easy loading of bag. A clear window pocket on the side of the bag for your rope history card and content information. Bottom grommet for tying rope through the bag and an inside clip in loop. A strip of 2" Reflective tape circles the entire bag for increased visibility. Bags made with tuff 16 oz. Vinyl Coated Polyester fabric for long lasting bags. Colors: Black & Orange. Made in the U.S.A.

Rope Storage and Protection

RNR, Poseidon Riggers Pack

A great new innovation in gear and equipment storage bags. The main compartment will hold 200' of 1/2" rope or additional equipment. The two side compartments are large enough to hold the essential equipment needed for a haul, belay or lowering system. The exterior of the bag has additional loops to hold more carabiners and other equipment.

ROPE & EQUIPMENT NOT INCLUDED.

Weight 2.2 lbs. Made in the U.S.A.

Features:

- Main compartment will hold 200' of 1/2" rope.
- 10 external loops for carabiners. etc. permit easy access.
- 2 padded shoulder straps for comfort while carrying long distances.
- Carrying handle on side of bag.
- Unique drawstring/buckle closure system allows the top to roll up out of the way for storage.
- Both side pockets each have 7 more daisy chain loops.
- Both side pockets have a removeable padded divider that have a total of 5 snap loops for securing larger gear

Rope Storage and Protection

SMC, Edge Roller

The SMC Edge Roller is a versatile piece of equipment most often used to reduce the friction of ropes running over edges of all kinds. An Edge Roller may also be used to protect fire hoses, air supply and communication lines passing over sharp or otherwise abrasive edges.

Lightweight aluminum frames are welded and then powder coated bright red for visibility, durability, resistance to corrosion and abrasion protection. Heat treated aluminum sheaves measuring 4" long by 2-1/2" in diameter with Oilite bushings on a 5/8" diameter plated steel axle for efficiency and durability at a reasonable cost.

Sold as a single unit, two Edge Rollers may be connected by quick links for applications involving a variety of edges and angles. Two 3/16" quick links are furnished with each Edge Roller. SOLD AS A SINGLE UNIT.

APPLICATIONS:

• Rescue • Industry & Work-related • Telecommunications • Utilities • Mining • Fire Departments • Mountaineering & Caving • Theatrical Rigging • Tactical

\$192⁰⁰

Rope Storage and Protection

SMC, Flex Clip Kit

The SMC Flex Clips are designed to attach multiple Flex Pads together to form the proper dimension of padding that a user needs for their edge protection requirements. The SMC Flex Pads takes a classic system, flexible channeled edge protection, and makes it new again. Instead of a few discrete channels running the length of the pad, the channels are made of a grid of raised holes in a strong, high density polyethylene sheet. The holes are sockets to accept Flex Clips which allow multiple Flex Pads to be attached, creating long runners for gradual edges, wide sheets for multiple line management, or both. The Flex allows the rescuer to accommodate the edge pro to the system, instead of having protection dictate the system.

The Flex Clips come 2 per package.

\$6²⁵

SMC, Flex Kit

The SMC FLEX was originally designed for the demanding Technical Fire Rescue market as a canvas replacement. But after using and sharing the FLEX we realized it is much more than just the ultimate in configurable rope management and protection. We realized

Rope Storage and Protection

SMC, Flex Kit (continued)

the FLEX is FLEXible in its uses and the only limitation is your own imagination. The FLEX can be used in a magnitude of configurations providing solutions for an ever growing amount of problems you might face while in the field or around the house. Use a stand alone FLEX or connection multiple FLEX pads with the FLEX Clips to help solve everyday problems.

The FLEX Kit includes two FLEX pads and two FLEX Clips which will allow you to connect the FLEX pads together and provides increased surface area.

FEATURES:

- Made from an ultra light-weight, durable, abrasion resistant plastic.
- Inter-connectable to configure into any form or fashion desired for when a longer or wider surface area is needed.
- Adaptable; can wrap about itself for protection objects from ropes, can be connected in sandwich fashion to form a rope channel, and so much more...
- 100% recyclable.

RECOMMENDED USES:

- Protect moving and non-moving ropes / webbing from abrasive edges
- Protect trees or anchors from damaging ropes / webbing
- Safely and efficiently redirect rope around obstacles
- Separate moving or static lines
- Snow / Sand Anchor
- Splint
- Back Support
- Mud Flap

\$68⁰⁰*Rope Storage and Protection, Edge Protection*

BORN, Entry Ease

This excellent stainless steel edge guard will give you the needed abrasion protection when entering over sharp edges. Will fit entries as small as 18". Entry-Ease is a tool that can be used in a variety of confined space entries where a tripod cannot be used. Works great with stretchers and people over manholes, ladder rungs, railings, pipes or any surface in which the lifeline may become damaged. Made in the U.S.A.

\$260⁰⁰

Rope Storage and Protection, Edge Protection

DMM EDGEHOG

Designed for protecting ropes in rope access, the ground-breaking Edgehog range of rope protectors has made worksites safer the world over. The ability to safely rig ropes through gratings enables the rope to be rigged from above to allow work to be safely performed below – this can eliminate the need to protect walkway edges or remove grating sections. The Edgehog can be secured to most rectangular hole gratings (commonly known as Kennedy Grating) with two 17mm fixing bolts.

- Twin rope slots with rounded, rope friendly radii
- Marine grade stainless steel for enhanced corrosion resistance in offshore environments
- Low profile to minimize trip hazard
- Fixation bolts with adjustments for different grating sizes (17mm spanner required)
- Maximum rope diameter: 13mm
- Clip-in point for transportation
- Minimum grating hole size: 24 x 58mm
- Maximum grating depth: 45mm

\$150⁰⁰

Pro-Tech Rope Protection System

SMC's new Pro-Tech Rope Protection System was created to be the ultimate solution to challenging rope protection scenarios. Pro-Tech can handle up to three moving or fixed ropes with captive pins that keep the ropes from "jumping the tracks." The polyacetal plastic was rigorously tested for durability and a low coefficient of friction to ensure that your ropes will be resolutely protected from damage while still sliding cleanly over obstacles. The "tractor tread" design articulates to match virtually any terrain feature and the modular system is infinitely reconfigurable giving you unsurpassed flexibility and peace of mind when rigging. Pro-Tech is available as a 23.4", 15 link unit with 14 straight pins and 3 angled pins.

Rope Storage and Protection, Packs & Bags

Camp Safety Cargo 40

Top load 40 liter backpack constructed from robust Tarpaulin PVC 500D. Top lid features inner zip pocket. Metal hook buckle closure with internal pull cord. Padded shoulder straps. Transparent label pocket. Loops for fixing rope ends. Hauling handle for loads up to 50 kg.

\$49⁹⁵

Camp Safety Hold 40

Lightweight duffle-style 40 liter backpack constructed from 600D polyester fabric. Unique zipper system runs the length of the pack on the back so the shoulder straps remain facing up while loading or unloading. Padded back and shoulder straps. Three transport handles and two daisy chains for clipping gear. Three external pockets. Transparent label pocket. Two interior gear loops.

\$79⁹⁵

Rope Storage and Protection, Packs & Bags

Camp Safety Shipper 90

90 liter duffle bag constructed from Tarpaulin PVC 500D that is perfect for hauling a lot of equipment to and from the work site.

Reinforced bottom with 600D polyester fabric. Can be carried as a shoulder bag or as a backpack with extra padding in the top flap for increased comfort. External zip pocket. Interior fixed pull cord compartment. Transparent label pocket.

\$107⁹⁵

Rope Storage and Protection, Packs & Bags

Camp Safety Spacecraft 45

A unique 45 liter backpack specifically designed for rope access and technical rescue.

Constructed from Tarpaulin PVC 500D with padded layers.

Semi-rigid structure with a clamshell closure allows for extremely easy access to gear.

40 internal attachment points allow for precise organization of gear with Spacecraft Bags (specially designed compartment bags that attach to the Spacecraft Pack or to a harness – the Spacecraft Pack is delivered standard with one Spacecraft Bag).

Secure closure with metal hook buckles. Padded back and shoulder straps. Three external pockets and straps for fastening a rope. Transparent label pocket. Hauling handle for loads up to 50 kg.

\$199⁹⁵

Camp Safety Spacecraft Bag

Accessory bag constructed from Tarpaulin PVC 500D for organizing gear.

The bag can be attached inside the Spacecraft backpack or the Wagon bucket. It can also be installed on any CAMP Safety rope access harness with the two quick links provided.

\$14⁹⁵

Rope Storage and Protection, Packs & Bags

Camp Safety Supercargo 70

Incredibly strong 70 liter haul bag designed for transporting gear and vertical hauling.

Constructed from super-stiff and amazingly wear-resistant Tarpaulin TPU 4500D.

Shoulder straps can be tucked into a streamlined compartment and the waist belt can be removed to prevent snagging when traveling and hauling.

Robust haul straps are equipped with lifting handles that are large enough to be used with gloves.

Roll top lid with pull cord closure and security strap. Interior security pocket and four interior gear loops.

\$249⁹⁵

Camp Safety Trailer 15

Compact 15 liter gear bag constructed from robust Tarpaulin PVC 500D.

Roll top closure. Transparent label pocket. Loops for fastening rope ends. Hauling handle for loads up to 50 kg.

\$24⁹⁵

Rope Storage and Protection, Packs & Bags

Camp Safety Trucker

Roll top backpack constructed from Tarpaulin PVC 500D with high-frequency welding.

Available in three sizes: 30, 45, 60 liters.

Padded back and shoulder straps. Roll top closure. One external zip pocket and one external zip opening allows access to the lower half of the main compartment.

Transparent label pocket. Interior zip pocket, gear loops and loops for fastening rope ends.

Hauling handle and two side loops for loads up to 50 kg.

Order No.	Price	Options

2783	\$59.95	Wagon 10
2784	\$79.95	Wagon 20

Rope Storage and Protection, Packs & Bags

NRS Ether Dry Sack 2L

- NRS Ether Dry Sacks bridge the gap between heavy-duty and ultra-light dry bags, giving you a lightweight but durable solution for keeping gear and clothing dry outdoors.
- The PU laminated ripstop nylon material is lightweight and durable, and the welded seams keep water out.
 - Designed with an envelope shape for easy stowing.
 - The water-tight fold closure must be closed properly to prevent water from getting in. Begin by folding the top strip over, and then fold (rather than roll) at least three more times before closing the buckle.
 - A D-ring on the quick-release buckle provides a handy attachment point.

Rope Storage and Protection, Packs & Bags

NRS Go Duffel Bag Red

For the outdoors person who's always on the go. No matter what the activity - boating, skiing, climbing, etc, the NRS Go! Bag, with it's waterproof urethane bottom and rugged Cordura upper packs it all.

- The heavy-duty welded urethane bottom keeps wet gear from leaking out and prevents outside moisture from leaking in.
- The 1000-denier Cordura® upper closes with a heavy-duty zipper and wears like iron.
- Two generous zippered outside pockets and two large inside zippered mesh pockets help you keep smaller items organized.
- It's big, but not too big. Like Goldilocks said, "It's just right" - 25" x 15" x 14", with a volume of 73 liters, 4,455 cubic inches.
- A comfortable carry handle, an ergonomic shoulder strap, compression straps over the closure zipper and external D-rings and attachment loops round out the features of this great bag.
- PVC-free and built to last a lifetime of heavy use.

\$89⁹⁵

Rope Storage and Protection, Packs & Bags

RNR Essential Rescuer Bag

The Rock-N-Rescue Essential Rescuer Bag offers a convenient way to transport your crucial equipment. The large, durable design allows you to transport harnesses, helmets, fire gear or almost anything else that your situation calls for. The main compartment can fit bunker gear, boots, and a turnout coat or harnesses, helmets, ropes and other rope and water rescue equipment. A smaller side compartment and an end compartment allow for storage of smaller equipment. The unique design with a mesh backside allows gear that has been in a burn or exposed to water air out.. Constructed of 1000 denier Magnatuff coated nylon fabric, mesh and a rugged vinyl bottom ensure that this bag will last for the long haul. Also equipped with carrying handles and a 2" wide shoulder strap for transport. Made in the U.S.A.

AQUAPAC, VHF Pro Radio Case - Small

Suitable for both left- and right-hand antenna radio the PRO VHF Radio cases are made of military specification reinforced vinyl material ideal for professional and rigorous uses. Guaranteed submersible to 30'. Supplied with a 3-way harness so you can wear your radio on your chest keeping your hands free. Made outside the U.S.A.

Features:

- The clever antenna design not only fits L- and R-handed radios but also creates an emergency grab handle.
- You can use your radio normally through the case, it doesn't interfere with sound or radio signals.
- Also protects from dust, dirt and sand.
- Like most of our cases it'll float if you drop it in the drink.
- The seams are high-frequency welded to form a super-strong bond.
- The Aquaclip® (a patented, ultra-secure, rustproof, injection-molded plastic seal) opens and closes with a simple twist of two levers, and everything stays in one piece even when open.

Rope Storage and Protection, Packs & Bags, Equipment Bags

Arbor Rope Storage Bag

The RNR ARBOR Rope Storage Bag is purpose-built to meet the demands of the modern arborist. The newly designed bucket style rope bag has a wide profile which makes it easier to stuff and store your climbing line. Each bag comes with a drawstring top closure and the top third of the bag is made of ripstop nylon and 2 webbing carry handles.

Features 4 side pockets with a top velcro closure to keep all your essential climbing system components in one area (rope wrench, hitch cords, carabiners, ascenders, use your imagination). Bags are made with tuff 1000 denier coated nylon fabric and nylon ripstop for a bag that will last through the toughest of jobs.

Proudly made by Rock N Rescue in the U.S.A.

Rope Storage and Protection, Packs & Bags, Equipment Bags

Camp Safety Cargo 40

Top load 40 liter backpack constructed from robust Tarpaulin PVC 500D.

Top lid features inner zip pocket. Metal hook buckle closure with internal pull cord. Padded shoulder straps. Transparent label pocket.

Loops for fixing rope ends. Hauling handle for loads up to 50 kg.

\$49⁹⁵

Camp Safety Hold 40

Lightweight duffle-style 40 liter backpack constructed from 600D polyester fabric.

Unique zipper system runs the length of the pack on the back so the shoulder straps remain facing up while loading or unloading. Padded back and shoulder straps. Three transport handles and two daisy chains for clipping gear. Three external pockets. Transparent label pocket. Two interior gear loops.

\$79⁹⁵

Rope Storage and Protection, Packs & Bags, Equipment Bags

Camp Safety Shipper 90

90 liter duffle bag constructed from Tarpaulin PVC 500D that is perfect for hauling a lot of equipment to and from the work site.

Reinforced bottom with 600D polyester fabric. Can be carried as a shoulder bag or as a backpack with extra padding in the top flap for increased comfort. External zip pocket. Interior fixed pull cord compartment. Transparent label pocket.

\$107⁹⁵

Rope Storage and Protection, Packs & Bags, Equipment Bags

Camp Safety Spacecraft 45

A unique 45 liter backpack specifically designed for rope access and technical rescue.

Constructed from Tarpaulin PVC 500D with padded layers.

Semi-rigid structure with a clamshell closure allows for extremely easy access to gear.

40 internal attachment points allow for precise organization of gear with Spacecraft Bags (specially designed compartment bags that attach to the Spacecraft Pack or to a harness – the Spacecraft Pack is delivered standard with one Spacecraft Bag).

Secure closure with metal hook buckles. Padded back and shoulder straps. Three external pockets and straps for fastening a rope. Transparent label pocket. Hauling handle for loads up to 50 kg.

\$199⁹⁵

Rope Storage and Protection, Packs & Bags, Equipment Bags

Camp Safety Spacecraft Bag

Accessory bag constructed from Tarpaulin PVC 500D for organizing gear. The bag can be attached inside the Spacecraft backpack or the Wagon bucket. It can also be installed on any CAMP Safety rope access harness with the two quick links provided.

\$14⁹⁵

Camp Safety Supercargo 70

Incredibly strong 70 liter haul bag designed for transporting gear and vertical hauling.

Constructed from super-stiff and amazingly wear-resistant Tarpaulin TPU 4500D.

Shoulder straps can be tucked into a streamlined compartment and the waist belt can be removed to prevent snagging when traveling and hauling.

Robust haul straps are equipped with lifting handles that are large enough to be used with gloves.

Roll top lid with pull cord closure and security strap. Interior security pocket and four interior gear loops.

\$249⁹⁵

Rope Storage and Protection, Packs & Bags, Equipment Bags

Camp Safety Trailer 15

NRS Ether Dry Sack 2L

NRS Ether Dry Sacks bridge the gap between heavy-duty and ultra-light dry bags, giving you a lightweight but durable solution for keeping gear and clothing dry outdoors.

- The PU laminated ripstop nylon material is lightweight and durable, and the welded seams keep water out.
- Designed with an envelope shape for easy stowing.
- The water-tight fold closure must be closed properly to prevent water from getting in. Begin by folding the top strip over, and then fold (rather than roll) at least three more times before closing the buckle.
- A D-ring on the quick-release buckle provides a handy attachment point.

NRS Go Duffel Bag Red

- For the outdoors person who's always on the go. No matter what the activity - boating, skiing, climbing, etc, the NRS Go! Bag, with it's waterproof urethane bottom and rugged Cordura upper packs it all.
- The heavy-duty welded urethane bottom keeps wet gear from leaking out and prevents outside moisture from leaking in.
 - The 1000-denier Cordura® upper closes with a heavy-duty zipper and wears like iron.
 - Two generous zippered outside pockets and two large inside zippered mesh pockets help you keep smaller items organized.
 - It's big, but not too big. Like Goldilocks said, "It's just right" - 25" x 15" x 14", with a volume of 73 liters, 4,455 cubic inches.
 - A comfortable carry handle, an ergonomic shoulder strap, compression straps over the closure zipper and external D-rings and attachment loops round out the features of this great bag.
 - PVC-free and built to last a lifetime of heavy use.

Rope Storage and Protection, Packs & Bags, Rope Storage Bags

RNR Poseidon Series Premium Bag

The Rock-N-Rescue Poseidon Series Premium Rope Bag has been built to meet the demands of confined spaces. The newly designed bag has a narrow profile which makes it easier to get in and out of confined spaces. Each bag comes with a drawstring top closure and the top third of the bag is made of ripstop nylon. Padded shoulder straps offer a more comfort when carrying the bag. Top carrying handles for easy loading of bag. It has a bottom grommet for tying rope through the bag. A 2" strip of reflective tape is sewn all the way around the bag and the word "RESCUE" is also made of a reflective material. Bags made with tuff 1000 denier coated nylon fabric and nylon ripstop for long lasting bags.

Available in three (3) different sizes:

- Small holds 150' of 1/2" rope
- Standard holds 200' of 1/2" rope
- Medium hold 300' of 1/2" rope.

Camp ANSI Truck Loops

High strength anchor loops constructed from 28 mm polyamide webbing covered with a tubular webbing sheath that protects the structural webbing from abrasion or exposure to other hazards. The inner main webbing is constructed of orange 25 mm (0.984 in.) Polyamid webbing which also acts as a damage indicator when visible thru the outer sleeve. The outer protective webbing sleeve is main of a black 28mm (1.1 in.) wide Polyamid webbing sewn with Polyamid thread. Available in four lengths: 60 cm (23.6 in.), 80 cm (31.5 in.), 120 cm (47.2 in.) and 160 cm (62.9 in.). Meet ANSI standard Z359.1 for anchorage devices.

Camp Safety Blin Kit 10 M + 0934 + 2030040F + 0981

A closed-system fall arrest kit designed to deliver maximum safety and performance. Suitable for both vertical and horizontal/inclined use (also certified for use over sharp edges $r=0.5\text{ mm}$). The fall arrest device cannot be removed from the rope to help prevent installation errors. The innovative cam creates smooth action on the rope whether it is being used to ascend or descend the line. Performance on vertical lines can be further increased by using the patented Rope Surfer on the connection lanyards.

Wear and tear on the rope is reduced to the minimum thanks to the specially designed locking mechanism that lowers the force transferred to the body in the event of a fall and locks the rope along a long axis, rather than pinching it aggressively with a toothed cam.

Hot forged stainless steel locking components combine with a robust aluminum alloy body for exceptional durability over time. Pre-equipped with robust Iridium 10.5 mm semi-static rope with stitched loops on the ends. Replacement rope kits are available.

Available with three connections:

- steel oval locking carabiner;
- 10.2 in. webbing lanyard (total length 16.5 in., including the carabiner and the quick link);
- 15.7 in. webbing lanyard (total length 22 in., including the carabiner and the quick link).

Certified for a maximum user weight of 265 lb. (for vertical use) or 220.5 lb. (for horizontal/inclined use).

Standards:

- EN 353-2
- CNB/P/11.075 for edges
- EAC

RNR Poseidon Pick-Off Strap

A very useful tool! Adjustable length utility strap. Often used to effect a one man pick off. When doubled it can be used as an anchor. Makes a great stretcher assist strap; four of them make up a stretcher spider. Adjustable sling from 9" to 54" length. Webbing will begin to slip through the adjuster at 3,000 lbf. (13.34 kN). Made in USA.

\$36⁵⁰

Sewn Webbing Products

RNR Poseidon Tech Load Releasing Hitch Sling

Load releasing straps are frequently used to tie a mariner's hitch or other types of releasing hitches. A load releasing hitch gives the user the ability to transfer the load from one device to another. The 60" long strap makes it a snap to size and tie a load releasing hitch. Made of 9,000 lbf. (40.03 kN) nylon webbing and forged 5,000 lbf. (22.24 kN) steel hardware. D-rings are color coded to indicate anchor and load ends. Not designed to function as a shock absorber. If shock loading is a possibility, we highly recommend the use of a shock absorbing device to limit the force delivered to the load releasing strap. Made in USA.

Sewn Webbing Products

RNR Utility Double "D-Ring" Cinch Tie Down Straps

The R-N-R Utility Cinch Tie Down Straps are a simple, effective way to secure and organize large sized loose objects. The straps are constructed out of 1.75 inch - 6,000 lbf. Mil-Spec nylon webbing and a pair of 5,000 lbf. aluminum D-Rings. They are the perfect way to neatly secure and store or transport piles of boards, stacks of pipe and other tubing and any other long, bulky objects - the possibilities are limitless. With strap lengths ranging from 4 feet all the way up to 12 feet, we have the utility strap to fit your storage or transport needs. Custom lengths are also available - just call for pricing. To use the strap, simply wrap the strap entirely around the items that you want to secure with the strap. Pass the loose end of the strap thru both of the d-rings and then pass the loose end back in between both of the buckles to form a cinch. Then simply pull tight on the end of the strap to tighten the load. A five inch loop is sewn into the free end of the webbing to allow the user a better grip to pull the strap as tight as possible. To form an even more secure connection, the free end of the webbing can be tied into an overhand knot at the top of the rings which will prevent the webbing from being pulled back thru the "d-rings" (see picture).

NOTE - THIS STRAP IS NOT INTENDED FOR NOR IS IT CERTIFIED FOR LIFE SAFETY PURPOSES.

RNR, Poseidon Heavy Duty Choker Anchor Straps

A true heavy duty anchor sling. Made of doubled 1 23/32" flat solid nylon webbing with 15,000 lbf. (66.7 kN) steel O rings sewn in each end. This is a "pass through" anchor strap with a 4" (3" I.D.) O-Ring on one end and a 2.25" smaller O-Ring on the other end. You simply wrap the strap around your anchor point, pass the small ring thru the larger ring and clip a carabiner into the small ring to form a quick, high strength anchor point. Available in 48 in. and 96 in. lengths. Made in the U.S.A.

RNR, RITS Sling

The RIT Sling is a multi-function, multi-loop sling that can be used in emergency harnessing of a firefighter or victim in a rescue situation. By placing the leg loops over the legs and the arms in the arm loops, you can easily drag someone from their immediate danger area. By using two carabiners you could hoist someone safely to get them out of a second floor window and down to safety. Color coded sections makes this a very useful and inexpensive rescue device. Comes complete with a storage bag. Made in the U.S.A.

Camp ANSI Truck Loops

High strength anchor loops constructed from 28 mm polyamide webbing covered with a tubular webbing sheath that protects the structural webbing from abrasion or exposure to other hazards. The inner main webbing is constructed of orange 25 mm (0.984 in.) Polyamid webbing which also acts as a damage indicator when visible thru the outer sleeve. The outer protective webbing sleeve is main of a black 28mm (1.1 in.) wide Polyamid webbing sewn with Polyamid thread. Available in four lengths: 60 cm (23.6 in.), 80 cm (31.5 in.), 120 cm (47.2 in.) and 160 cm (62.9 in.). Meet ANSI standard Z359.1 for anchorage devices.

RNR, Anchor Strap Wrap Protection

Protect your anchor strap from sharp edges, chemical contamination, splinters and other objects that can cause damage to your strap with the new R-N-R wrap protection sleeve. Solidly constructed of layers of cotton duck and a velcro closure running the length of the sleeve. Once in place, this sleeve can protect the webbing and will not fall off the strap under the worst of conditions. The sleeves are constructed so that the stitching is visible for easy inspection. Four different lengths to choose from. Made in the U.S.A. ANCHOR STRAP NOT INCLUDED

Sewn Webbing Products, Nylon Webbing Slings

Camp Safety Blin Kit 10 M + 0934 + 2030040F + 0981

A closed-system fall arrest kit designed to deliver maximum safety and performance. Suitable for both vertical and horizontal/inclined use (also certified for use over sharp edges $r = 0.5$ mm). The fall arrest device cannot be removed from the rope to help prevent installation errors. The innovative cam creates smooth action on the rope whether it is being used to ascend or descend the line. Performance on vertical lines can be further increased by using the patented Rope Surfer on the connection lanyards.

Wear and tear on the rope is reduced to the minimum thanks to the specially designed locking mechanism that lowers the force transferred to the body in the event of a fall and locks the rope along a long axis, rather than pinching it aggressively with a toothed cam.

Hot forged stainless steel locking components combine with a robust aluminum alloy body for exceptional durability over time. Pre-equipped with robust Iridium 10.5 mm semi-static rope with stitched loops on the ends. Replacement rope kits are available.

Available with three connections:

- steel oval locking carabiner;
- 10.2 in. webbing lanyard (total length 16.5 in., including the carabiner and the quick link);
- 15.7 in. webbing lanyard (total length 22 in, including the carabiner and the quick link).

Certified for a maximum user weight of 265 lb. (for vertical use) or 220.5 lb. (for horizontal/inclined use).

Standards:

- EN 353-2
- CNB/P/11.075 for edges
- EAC

RNR Utility Double "D-Ring" Cinch Tie Down Straps

The R-N-R Utility Cinch Tie Down Straps are a simple, effective way to secure and organize large sized loose objects. The straps are constructed out of 1.75 inch - 6,000 lbf. Mil-Spec nylon webbing and a pair of 5,000 lbf. aluminum D-Rings. They are the perfect way to neatly secure and store or transport piles of boards, stacks of pipe and other tubing and any other long, bulky objects - the possibilities are limitless. With strap lengths ranging from 4 feet all the way up to 12 feet, we have the utility strap to fit your storage or transport needs. Custom lengths are also available - just call for pricing. To use the strap, simply wrap the strap entirely around the items that you want to secure with the strap. Pass the loose end of the strap thru both of the d-rings and then pass the loose end back in between both of the buckles to form a cinch. Then simply pull tight on the end of the strap to tighten the load. A five inch loop is sewn into the free end of the webbing to allow the user a better grip to pull the strap as tight as possible. To form an even more secure connection, the free end of the webbing can be tied into an overhand knot at the top of the rings which will prevent the webbing from being pulled back thru the "d-rings" (see picture).

NOTE - THIS STRAP IS NOT INTENDED FOR NOR IS IT CERTIFIED FOR LIFE SAFETY PURPOSES.

RNR Poseidon Pick-Off Strap

A very useful tool! Adjustable length utility strap. Often used to effect a one man pick off. When doubled it can be used as an anchor. Makes a great stretcher assist strap; four of them make up a stretcher spider. Adjustable sling from 9" to 54" length. Webbing will begin to slip through the adjuster at 3,000 lbf. (13.34 kN). Made in USA.

\$36⁵⁰

Sewn Webbing Products, Specialty Straps

RNR Poseidon Tech Load Releasing Hitch Sling

Load releasing straps are frequently used to tie a mariner's hitch or other types of releasing hitches. A load releasing hitch gives the user the ability to transfer the load from one device to another. The 60" long strap makes it a snap to size and tie a load releasing hitch. Made of 9,000 lbf. (40.03 kN) nylon webbing and forged 5,000 lbf. (22.24 kN) steel hardware. D-rings are color coded to indicate anchor and load ends. Not designed to function as a shock absorber. If shock loading is a possibility, we highly recommend the use of a shock absorbing device to limit the force delivered to the load releasing strap. Made in USA.
