

## JUMPBUNCH LEAF RUBBING

- Find a good leaf to draw from. Look at the texture and features on the leaf. Check for holes.
- Place the leaf on a hard surface. You can use a notebook or a piece of cardboard. Put the leaf “veins” towards you (the bottom of the leaf).
- Put a white sheet of paper on the leaf. You may want to tape the leaf down to keep it in place.
- Rub a crayon or pastel on its side and gently color on the layered paper over the leaf. Notice that you’ll be “drawing” the leaf on the paper.

Repeat this craft with other leaves and colors. Use soft and hard leaves to compare how drawings come out.
