

BizTech REMOTE DBA

Microsoft® SQL Server

Database Administration is essential for the integrity of your SQL Server, but it can be a time-consuming burden on your IT Staff.

Free up your internal resources for other important projects by having BizTech's team of VISUAL and Database experts do these monthly DBA tasks for you!

BizTech offers Remote Database Administration (RDBA) to customers using Infor VISUAL ERP with Microsoft's SQL Server database platform.

For a fixed monthly price, your SQL Server databases are monitored 24/7 and managed from a remote location. Our expert Database Admins will ensure that your databases and server system are at optimal performance.

Included RDBA Services:

- Analyze your servers & databases
- Verify VISUAL database triggers & indexes
- Create a Database Maintenance Plan
- Transaction log backup every 2-4 hours
- Daily scheduled local backups
- Daily updates of indexes & statistics
- Email notifications from DB Server
- Daily transaction log report, including errors
- Includes up to 4 hours per month of Database Recovery Services

Optional Add-On Services:

- Weekly database backup to cloud data center
- Monthly database backup to data center
- Monthly database server Microsoft Service Pack & patch review with Server Health Report
- Daily backup of all critical database server files to cloud data center (up to 50 GB)
