

Top 5 reasons to upgrade Infor CloudSuite Industrial (SyteLine)

Infor CloudSuite™ Industrial (SyteLine) is a robust ERP solution with built-in best practices and highly efficient process flows to help manufacturers improve productivity.

1

ENHANCED INDUSTRY CAPABILITIES WITH SIMPLIFIED UPGRADES

Infor CloudSuite Industrial introduces a wide array of new, highly focused industry-specific capabilities, including specialized pricing and promotions and compliance features for manufacturers and distributors, as well as detailed industry packs tailored for Automotive, Printing & Packaging, Process, and Molding companies. Combining industry capabilities ready right out of the box and the Infor OS platform, which includes the latest version of the Infor Mongoose development framework, you can reduce, eliminate, or reconfigure your personalizations and modifications so future upgrades are less intrusive and easier to implement.

2

BETTER ACCESS TO DECISION MAKING DATA

With an improved user experience, enhanced navigation, and easier access to information, Infor CloudSuite Industrial helps you improve teamwork and gain competitive advantage. With our versatile new responsive design master forms, Infor Ming.le™ homepages, 360 forms, and process forms, along with access to the latest Infor CloudSuite BI, KPIs, and dashboards with contextual analytics and new Infor Document Management, you'll have the information you need to make better decisions faster.

3

MOBILE ACCESS ANYWHERE, ANYTIME

Because you can access Infor CloudSuite Industrial through an ordinary web browser, you gain better control, greater visibility, and easier management across your entire enterprise. You're also not constrained to a specific type of end-user hardware, which gives you far greater latitude over how and where and when you access the information from the solution. You can also take advantage of Infor Ming.le and Infor BI mobile applications for greater flexibility.

4

GLOBAL FINANCIAL CAPABILITIES

Infor CloudSuite Industrial helps you stay current with respect to taxation, reporting, rule-based accounting, electronic banking, and government messaging requirements. It also supports the requirements of dozens of different countries. Its multi-book accounting capabilities help you stay flexible and grow your business around the world.

5

ACCESS ENTERPRISE CAPABILITIES FROM BEST-OF-BREED SOLUTIONS

Built for the cloud, Infor CloudSuite Industrial is a complete manufacturing solution with the flexibility and sophistication you need to grow your business. Infor CloudSuite Industrial includes advanced capabilities for integration, social collaboration and business intelligence, and access to best-of-breed solutions for customer relationship management, configure-price-quote, product lifecycle management, and more. With Infor CloudSuite Industrial, you gain a whole new level of capabilities to manage your operations.

Infor CloudSuite Industrial (SyteLine)

ROADMAP

2014	2015	2016	2017
10x	10x	OS	OS
Automotive Suppliers	Pick/Pack/Ship enhancements	Multi-currency from AR to AP	Disconnected service mobile app
Japanese localizations	Finance enhancements	Currency engine	Hybrid cloud deployments—MT to both ST and on-premise
Distribution for manufacturers	Human Resource enhancements	Mobile Service	OCR with IDM
Dimensional planning	Employee self-service portal	Global Payroll	SQL 2016
Molding and Fabrication	Germany, France, and Italy localizations	OS platform adoption	Planning at warehouse level
Infor Factory Track, Shop Floor	Process manufacturing	<ul style="list-style-type: none"> Infor Ming.le homepages Infor Document Management BI and 20+ dashboards by user role and function 	GT Nexus integration
Supply Chain Execution	Infor PLM Accelerate	Bi-directional integration to Infor CRM	Infor Local.ly adoption
Demand Planning		Integration to Infor XM	Portals in multi-tenant cloud
Product Configuration on Customer Portal		UX Enhancements—Responsive design	Infor Rhythm
			Infor Approva

STRATEGIC OBJECTIVES

Lower Total Cost of Ownership

Continue to minimize total cost of ownership with the expansion of industry and manufacturing solutions, such as adding support for multi-site to minimize the need for customizations.

You can also take advantage of the new Infor Mongoose application development framework to support new extensibility and reporting.

Specialize by Industry

Deliver specialized functionality for focus industries, including Printing & Packaging, Automotive Suppliers, Distribution for Manufacturing, Injection Molding, Process Manufacturing, and more; add pre-packaged integration, role-based business process flows, and analytic content, including Electronic Signature, Service Management, Shop Floor Automation, Dimensional Inventory, and Approved Manufacturers.

Enable Adoption of High-value Extension Applications

Provide high value expansion opportunities for customers with packaged integrations. ION-based integrations to Expense Management (XM), Enterprise Asset Management (EAM), Supply Chain Execution, mobile applications, e-commerce, Infor CRM and Infor PLM Accelerate. Point-to-point integrations to Configure Price Quote, and Infor BI and Query & Analysis.

Make Upgrades Seamless

Enable customers to upgrade easily and efficiently through predefined content packs, cloud or phased upgrades, and mobile applications.

With the new Infor Mongoose application development framework you can support automatic reviews when you run form synch during upgrade.

OS HIGHLIGHTS

Move to the Future with New ION Integrations to Extension Apps

Provides a more compelling extended suite with a less risky, lower cost way to take advantage of new, high value capabilities.

New, Modern User Experience—Social and Mobile

Reinvented user experience provides a completely modern solution, while delivering more robust functionality through compelling workflows built in to the application and across a broader suite. Our new responsive design for master forms, role-based Ming.le homepages, new contextual KPIs and document management applications, new reports forms and data view reports, and design mode supported through a web browser helps you create your own unique experience.

Expanded Micro-vertical Functionality with Focused Industry Packs

Automotive Suppliers, Printing & Packaging, Process Manufacturing, and Molding/Plastics fabrication companies can take advantage of and extend their core ERP investment with the best-of-breed, last-mile industry functionality within CloudSuite Industrial.

More Robust Business Intelligence

Helps customers and prospects get more value out of their deployment by enabling better, expanded visibility into the business at all levels, to drive better decision making.

New executive dashboards based on specific KPIs from the Infor Value Engineering team are tailored for unique user roles and business functions across your enterprise.
