

Different Thinking for Litigation and Investigations.

Processing and Early Case Assessment

An ECA solution to complement review platforms like Relativity or Ringtail.

EDT SOFTWARE INTEGRATES PROCESSING, ANALYSIS, REVIEW, PRODUCTION AND PRESENTATION FEATURES IN ONE EASY TO USE PLATFORM.

ITERATIVE ANALYSIS AND SAMPLING TOOLS ALSO PROVIDE EARLY INSIGHTS INTO DOCUMENTS SO IRRELEVANT DATA CAN BE CONFIDENTLY CULLED BEFORE SIGNIFICANT COSTS ARE INCURRED.

discover**edt**.com

EDT is an excellent processing and ECA solution to complement review platforms like Relativity or Ringtail. It provides early insight into your collected data via metadata filters and full text analysis tools that enable you to cull with confidence before processing the remaining data into a load file for your review platform.

Why pay to process or host irrelevant data?

Proportionality can be facilitated through intelligent, insightful culling before the data is ingested into your review software. This reduces processing and hosting costs and review time.

EDT provides lawyers or investigators with true insight into their data, very early, so they can filter out the irrelevant material, reduce the volume to a 'proportionate' number and prioritize the documents that are most likely to be relevant before the review gets underway.

"The defining moment was when the lawyers realized we didn't need to incur the cost of processing to create a load file prior to the review. The efficiencies were enormous."

Christopher Redlich
Litigation Support Manager
Allen & Overy LLP

"EDT is a powerful ECA platform for Relativity. It gives deep insight into the collected data and enables litigators to make informed decisions at the very beginning of the case.

They can see the impact of their proposed filters and enables them to drill down into the content of those documents. This really puts ECA in the hands of the legal team.

It delivers enormous savings because intelligent culling and prioritization takes place prior to the creation of the load files. This means lower processing and hosting costs, not to mention enormous reductions in review time and cost."
