Backup to the Cloud

GreenPages®
Technology Solutions
Physical. Virtual. Cloud.

Veeam Cloud Connect makes backup to the cloud easy.

Enhance Business Continuity with a Secure, Compliant Backup Solution

Veeam© Cloud Connect™, a module within Veeam Availability Suite™ v8, is a seamless way to establish offsite backup. In just a few minutes you can start backing up to the cloud through GreenPages, without a VPN or separate console. Your cloud repository works just like a local resource, except that your cloud data is available even if your primary backup or datacenter is lost.

Organizations welcome these benefits of Veeam Cloud Connect:

↗ Reduce the capital cost of backup equipment and the resources required for onsite, manual backup

↗ Meet compliance and security mandates in fields such as healthcare, financial services and e-commerce

↗ Enhance business continuity – your backup can be restored in the cloud and run as cloud servers

↗ Receive the non-stop service and continuous protection of a fully redundant system – without the expense

Why Choose Veeam Cloud Connect from GreenPages?	
Secure, compliant cloud	• Hosted on a secure and compliant cloud infrastructure built on enterprise-class hardware • Highly available and redundant infrastructure
Encrypted transfers	• All backup traffic is securely transferred with end-to-end AES 256 encryption at source (during backup), in transit and at rest • No negative impact on built-in compression, deduplication and WAN Acceleration
Automation	• Backups automatically take place according to your schedule
Cost efficiency	• Eliminate capital outlays for onsite backup equipment • Reduce offsite datacenter costs including space, power, network, equipment
Enhanced replications	• 50x faster replication and up to 20x reduction in bandwidth consumption with WAN Acceleration • Replication from backup files without impacting your production environment
Scalable	• Quickly and easily add resources and capacity as needed
Fast startup	• Experienced engineers, easy setup and quick provisioning allow you to get started immediately

Backup to the Cloud

Veeam Cloud Connect automates offsite backup with advanced security measures.
### *Highly Scalable. Easy to Manage. Always Secure.*

By moving your backup service to the cloud, you eliminate upfront capital expenditures for equipment and increase security and reliability with an automated offsite backup. GreenPages' secure, compliant infrastructure addresses the key obstacle for many companies considering a move to the cloud. With Veeam Cloud Connect, cloud repositories are completely isolated form one another. You can also encrypt your backup at the source, before data leaves your network and without increasing bandwidth consumption.

Easy Setup

1. Once you have selected GreenPages as your service provider, we will provide you with credentials.
2. Within Veeam 8, click on "Add a service provider."
3. Enter the credentials provided by GreenPages.
4. Your cloud repository will appear in your backup infrastructure.
5. That's it! And you can check the status of your backup at any time from your Veeam 8 dashboard.

Industry-Leading Technology

↗ Maintain full control of your Veeam resources and backup

↗ Secure, compliant cloud infrastructure built on enterprise-class hardware

↗ HIPAA and PCI compliant datacenter

↗ Cisco UCS infrastructure

↗ Geographic redundancy for business continuity

↗ Easily scalable to meet emerging needs and capacity demands
