Hybrid Cloud Strategy Workshop

An opportunity for your IT Team to learn how to build and manage a more unified, cost-effective, and scalable hybrid cloud environment. Learn how other companies are transforming their organizations by enabling hybrid cloud and how you can get started.

Overview

The move to hybrid cloud computing environments—public, private, and community—creates new opportunities along with many challenges for both IT executives and administrators alike:

- IaaS, PaaS, SaaS, DRaaS, ITaaS—which offerings are ready for prime time?
- No way to know whether or not cloud projects are providing benefits
- Pressure to "move to the cloud" and take advantage of emerging technology, all while keeping the lights on
- Demand from business units for service catalogs full of relevant items
- Pressure from developers to rapidly provision infrastructure
- Many different cloud providers to partner with; which one is the right one for your organization?
- No unified single-pane-of-glass infrastructure visibility
- Difficulty meeting stringent SLA goals and no runbook automation
- LOBs going around IT to public cloud providers resulting in high costs and security risk

Benefits

In the Hybrid Cloud Strategy Workshop workshop, you'll work directly with GreenPages' cloud experts and study real-world examples where organizations were able to successfully implement hybrid cloud solutions with measurable benefits for both the business and IT.

Geared toward IT Executives and their teams, you'll learn how to:

- Get started quickly with hybrid cloud; create an effective strategy to plan, build, run, and govern hybrid cloud environments
- Determine the best way to leverage automation and integration with existing systems
- Improve and scale IT operations management with the right people in the right places
- Learn how to build a service catalog that is relevant for your internal customers
- See how an existing application can be provisioned in a hybrid environment
- Get control of key areas such as: resource management, security, and resiliency
- Understand the magnitude of Shadow IT and the business motivations for its adoption
- Empower your LOBs by acting as a service provider to the business, rather than a roadblock
- And much more!

Who Should Attend

GreenPages' Hybrid Cloud Strategy Workshop is ideal for IT teams of 5-8 people but can be tailored to meet your organization's specific needs. GreenPages will hold a pre-workshop call to personalize agenda.

Scope

8 hour collaborative workshop; onsite at your organization

Workshop Deliverables

- Key findings and next step strategy recommendations
- General roadmap outlining critical activities and considerations over the next 12-24 months
- Knowledge transfer to your IT staff

To set up your Hybrid Cloud Strategy Workshop, contact GreenPages at 800-989-2989

About GreenPages

GreenPages is a leading systems integrator and cloud services company that helps clients fully virtualize their environments and transform their datacenter and IT operations to strategically leverage the power of cloud computing. The company's deep technology expertise, broad engineering certifications, and Cloud Management as a Service (CMaaS) solution provide organizations across the U.S. with unparalleled visibility into and control of modern-era hybrid cloud environments.
