

Development Services by Calance

Simply implement custom developed applications

Fire your vendors. Hire a strategic partner.

Calance prides itself on being a partner rather than just another vendor. To us, being a partner means understanding your business objectives, not just your technology environment and being an extension of your team. As a result, we can offer customizable service bundles that meet your evolving business needs.

Round-the-Clock Support

24x7x365 support to maximize efficiency and flexibility.

Global Resources

Hybrid options for maximized value.

Primary Functions

Web, Mobile & IoT
Data & Insights
SharePoint Development
Conversions & Migrations

Front End & Back End
Best Practices & Optimization
Analytics
Ongoing Support

The Calance Way

Calance prides itself on having top notch customer service and adaptability. Our Applications Development team delivers solutions that match your ongoing business needs. Our application architects design systems that are optimized to increase functionality and system integration as your business evolves. Our team will work with you for efficient resource allocation and increased ROI. Whether you need a team for the long-term, or just for small projects, Calance will deliver the highest value option.

Web, Mobile, & IoT

Custom application development from design and development, to ongoing operations and continuous improvement of your apps.

Data & Insights

From data management, to data visualization, to the development of actionable insights, we turn your data into valuable insights.

SharePoint Development

End-to-end service to migrate, upgrade, install, integrate, or enhance your SharePoint.

Conversions & Migrations

Legacy application conversions and migrations to new technologies, application integrations, and website redesign and redevelopment.

Front End & Back End

Expertise in front end and back end development technologies with tailor-built solutions.

Best Practices & Optimization

Improved system performance and service delivery using best practices for increased customer success. Competitive Service Level Agreements (SLAs) to match your business needs.

Managed Services

Utilize our Managed Services team that includes Service & Network Engineers, Service Desk, QA, and NOC for no additional cost.

Analytics

Your dedicated Account Manager will provide regular check-ins along with account analytics. These analytics will help adapt your needs if necessary for the best possible solution. Automation and testing tools to ensure a secure process.

Ongoing Support

Ongoing maintenance and support with strategic and competitive Service Level Agreements (SLAs).

At Calance We:

- Focus on empowering stakeholders towards deeper collaboration and engagement
- Maximize value through quality of service and cost efficiency
- Follow best practices
- Streamline workflows and add automation to transform business processes
- Create custom solutions to meet your needs
- Make customer service our top priority

Let's Get Started!

To get started, we take you through a comprehensive needs-based assessment to analyze current applications and functionality gaps. With the analysis in hand, we devise a comprehensive roadmap around the design and planning stages. A technical roadmap is finalized upon receiving stakeholder feedback. Contact our team today to get started!
