

SAP Services by Calance

Maximize the Value of Your SAP

Fire your vendors. Hire a strategic partner.

Calance prides itself on being a partner rather than just another vendor. To us, being a partner means understanding your business objectives, not just your technology environment. By doing this we can offer customizable service bundles that meet your evolving business needs.

Round-the-Clock Support

24x7x365 support to maximize efficiency and flexibility.

Global Resources

Hybrid options for maximized value.

Primary Functions

The Calance Way

Calance prides itself on having top notch customer service and adaptability. Our SAP team delivers solutions that match your ongoing business needs. Our team will work with you for efficient resource allocation and increased ROI. Whether you need a team for the long-term, or just for small projects, Calance will deliver the highest value option.

Support Desk

Receive personalized 24x7x365 support from our highly trained team. Experience best-in-class procedures based on Run SAP processes, templates, incident management tools, and reporting mechanisms.

Application Management Service (AMS)

Cost-effective AMS with SAP technology innovations centered on SAP HANA, Cloud, and mobility.

Best Practices & Optimization

Improved system performance and service delivery using best practices for increased customer success. Competitive SLAs to match your business needs.

Application Support

Application development, emerging application recommendations, system design configuration, testing and deployment.

Infrastructure Service

Manage and host SAP Environments with reduced Total Cost of Ownership (TCO) through consulting and Application Management Support.

Implementation & Roll-Out

Design, architecture and strategy roll-out using a standardized SAP implementation model to reduce costs, improve business processes, and optimize your solution.

Migration & Upgrades

Assessment services to determine necessary Migrations and Upgrades in SAP Environments to a S/4 HANA solution to improve operational excellence.

Enterprise Application Integrations

Flexible options for integrating business software applications and systems in order to automate business processes. We have solutions for both A2A and B2B scenarios and supports different OS, DB versions including Legacy systems.

At Calance We:

- Focus on empowering stakeholders towards deeper collaboration and engagement
- Maximize value through quality of service and cost efficiency
- Follow SAP best practices
- Streamline workflows and add automation to transform business processes
- Create custom solutions to meet your needs
- Make customer service our top priority

Let's Get Started!

To get started, we take you through a comprehensive needs-based assessment to analyze current applications and functionality gaps. With the analysis in hand, we devise a comprehensive roadmap around the design and planning stages. A technical roadmap is finalized upon receiving stakeholder feedback. Contact our team today to get started!
