

BRIEFCAM FOR LAW ENFORCEMENT

Transform Video Into Actionable Intelligence for Driving Preparation, Prevention, Protection and Pursuit

PREPARE EFFICIENTLY

The BriefCam Video Content Analytics Platform enables law enforcement to drive the preparation that is critical for efficient and effective policing. When law enforcement agencies dynamically integrate cutting-edge technologies and train forces to utilise the latest security methodologies, they empower police to prevent incidents, protect people and property and pursue intelligence and evidence.

RAPID TIME-TO-VALUE: The BriefCam Video Content Analytics Platform complements existing video surveillance systems for immediately transforming video data into actionable intelligence.

COMPREHENSIVE & EXTENSIBLE: To combat the challenges of modern-day law enforcement, BriefCam offers a robust portfolio of critical video analytics capabilities, delivered in three fully integrated platform modules, REVIEW, RESPOND AND RESEARCH.

FLEXIBLE ARCHITECTURE: BriefCam offers flexible deployment options, including centralised, distributed, cloud, edge and hybrid architectures, as well as the turnkey Investigator Appliance.

PREVENT PROACTIVELY

BriefCam helps police agencies prevent public safety issues by providing comprehensive situational intelligence and real-time alerting, empowering police to make intelligent decisions for immediate and long-term responses to their challenges.

CREATE VIDEO INTELLIGENCE DASHBOARDS: BriefCam aggregates and extracts video data into visual reports, dashboards, and heatmaps that reveal trends and patterns. Quantitatively analyse video and derive actionable insights for data-driven safety, security, and operational decision making, from optimising traffic flows and people counting to preventing crime by identifying anomalous and suspicious behaviours captured in video.

DERIVE FORENSIC INTELLIGENCE IN THE FIELD: The BriefCam Mobile Application, extends BriefCam's powerful post-event investigation capabilities into the field and makes video searchable on the go. Rapidly pinpoint men, women, children, and vehicles, as well as face recognition, across surveillance cameras, within selected time ranges, all from a mobile device.

TRIGGER REAL-TIME ALERTS: Create real-time, rule-based alerts to drive proactive and immediate response to dynamic situations, from terrorist threats to missing persons.

PROTECT EFFECTIVELY

BriefCam's real-time alerts enable organizations to protect people and places and respond to situational changes as they unfold.

WATCHLIST & ALERT CONFIGURATION: Rapidly detect and trigger alerts for suspicious or missing persons or vehicles based on watchlists of digital images, with BriefCam's fully-integrated "In the Wild" face recognition and license plate recognition technologies.

OBJECT CLASSIFICATION ALERTS: Trigger notifications when certain conditions are met; with BriefCam's comprehensive object classification, appearance similarity and line crossing detection, you can pinpoint persons of interest without biometric data.

PEOPLE COUNTING ALERTS: Identify anomalous activity in real time and monitor the increase or decrease of people in a pre-defined range of view or area with real-time count-based alerts. Operators are alerted when the defined threshold is crossed, enabling police to make quick decisions, respond rapidly and deploy relevant personnel.

PURSUE PRODUCTIVELY

BriefCam's unmatched object detection and extraction accuracy dramatically improves post-event investigation productivity by pinpointing people and objects of interest with speed and precision.

SEARCH FOR EVIDENCE ACROSS CAMERAS: Advanced multi-camera search identifies men, women, children and vehicles of interest, using accurate face and license plate recognition, appearance similarity, apparel, colour, size, speed, path, direction, dwell, and illumination change filters.

MANAGE CASES EFFECTIVELY: Organise all video assets of an investigation in a single container, bookmark objects of interest, summarise case findings in an exportable report, and collaborate on cases with other users.

ACCELERATE VIDEO REVIEW: BriefCam's VIDEO SYNOPSIS® solution simultaneously presents objects that have appeared at different times within the video, resulting in a dramatically shorter video segment that enables viewers to analyse the scene and review of hours of video in minutes.

ABOUT BRIEFCAM

BriefCam is the industry's leading provider of VIDEO SYNOPSIS® and Deep Learning solutions for rapid video review and search, face recognition, real-time alerting and quantitative video insights. By transforming raw video into actionable intelligence, BriefCam dramatically shortens the time-to-target for security threats while increasing safety and optimizing operations.
