

SafeGuardCyber

Drive Business Forward

WITHOUT FEAR

Are your cybersecurity policies
empowering your employees or
holding them back?

New Technologies & New Risks

Today's digital landscape provides new avenues for enterprise businesses to **innovate and grow**. These digital channels bring together the powers of **scale and efficiency**. These tools are necessary to compete today, but they bring **new risks**.

Communication

Social Media

Cloud Apps

Collaboration

Chat

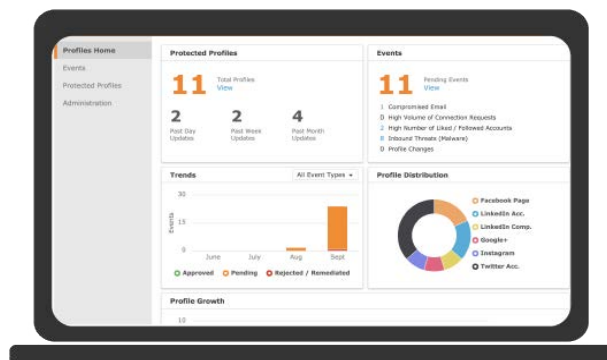

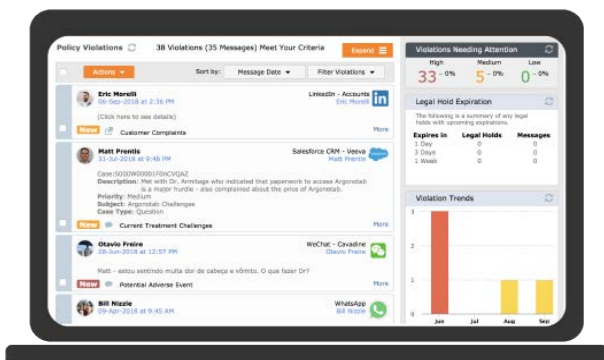

Risk	Possible Outcome
Account Takeovers	Mass malware distribution, company liability
Brand Impersonation	Reputational damage, shareholder confidence
Whaling	Market manipulation, company liability
Phishing and Malware	Infrastructure damage, data loss
Espionage & IP Theft	Revenue loss, compromised copyrights
Regulatory Violations & Fines	Legal action, massive fines

“There’s currently a massive dislocation between what attackers can do and what defenders can prevent.”

Dave DeWalt
Former CEO McAfee, FireEye
SafeGuard Cyber Board Vice-Chair

Detect, Prevent, and Defend

With best-in-class machine learning algorithms and a **customizable policy engine**, SafeGuard Cyber provides a single view into a company’s entire digital risk profile, with tools to **detect, prevent, and defend against threats** across 52+ channels. Our platform also **automates compliance and governance** for enhanced information management.

About SafeGuard Cyber

SafeGuard Cyber provides a single solution to **manage the full spectrum of digital risk**. Customers and partners include Johnson & Johnson, USAA, McAfee, and other leading brands across 18 industries, 25 countries, and over 50 languages.

We empower enterprise businesses to embrace new technologies and seize new opportunities
