NFIB SMALL BUSINESS ECONOMIC TRENDS

NFIB Research Center has collected Small Business Economic Trends Data with Quarterly surveys since 1973 and monthly surveys since 1986. The sample is drawn from the membership files of the National Federation of Independent Business (NFIB). Each was mailed a questionnaire and one reminder. Subscriptions for twelve monthly SBET issues are \$250. Historical and unadjusted data are available, along with a copy of the questionnaire, from the NFIB Research Center. You may reproduce Small Business Economic Trends items if you cite the publication name and date and note it is a copyright of the NFIB Research Center. © NFIB Research Center. ISBS #0940791-24-2. Chief Economist William C. Dunkelberg and Director of Research and Policy Analysis Holly Wade are responsible for the report.

SUMMARY

OPTIMISM INDEX

The June Index of Small Business Optimism is the sixth highest reading in survey history. The Index declined slightly in June, falling 0.6 points to 107.2. Since December 2016, the Index has averaged an astounding, unprecedented 105.4, compared to 92.4 for 2009-2016, well below the 45 year average of 98. The 1983-1990 expansion boasted an Index average of 101.5, including the record reading of 108.0. Although less exuberant than the current run, it produced quarterly job creation of 689,000 new jobs compared to 440,000 in the 2009-2016 period, even with a much bigger economy. Overall, a very solid report, with the Index among the highest readings in 45 years.

LABOR MARKETS

Reports of employment gains remain strong among small businesses. Owners reported adding a net 0.19 workers per firm on average, virtually unchanged from May and a good number. Fifteen percent (down 1 point) reported increasing employment an average of 3.6 workers per firm and 12 percent (up 4 points) reported reducing employment an average of 1.6 workers per firm (seasonally adjusted). Sixty-three percent reported hiring or trying to hire (up 5 points), but 55 percent (87 percent of those hiring or trying to hire) reported few or no qualified applicants for the positions they were trying to fill. Twenty-one percent of owners cited the difficulty of finding qualified workers as their Single Most Important Business Problem (down 2 points), a few points below the survey record. Thirty-six percent of all owners reported job openings they could not fill in the current period, up 3 points matching the survey record high set in November 2000. Twelve percent reported using temporary workers, unchanged. A seasonally-adjusted net 20 percent plan to create new jobs, up 2 points from May and very strong. Labor markets are very tight, for both skilled and unskilled workers. Thirty-one percent have openings for skilled workers, and 13 percent have openings for unskilled labor, both ahead of the May readings. More firms are looking for workers than workers looking for a job. And the hiring strength is in industries that pay well: construction, manufacturing, and financial services.

CAPITAL SPENDING

Fifty-nine percent reported capital outlays, down 3 points from May, but solid. Of those making expenditures, 44 percent reported spending on new equipment (down 3 points), 26 percent acquired vehicles (up 2 points), and 14 percent improved or expanded facilities (down 2 points). Five percent acquired new buildings or land for expansion (down 1 point) and 12 percent spent money for new fixtures and furniture (down 1 point). Solid investment spending is necessary to produce the improvements in productivity that will secure future increases in real wages. Twenty-nine percent plan capital outlays in the next few months, down 1 point from May. Plans were most frequent in manufacturing (38 percent) where additional capacity and productivity-enhancing investments are needed.

This survey was conducted in June 2018. A sample of 5,000 small-business owners/members was drawn. Six hundred and sixty-five (665) usable responses were received – a response rate of 13 percent.

SALES AND INVENTORIES

A net 10 percent of all owners (seasonally adjusted) reported higher nominal sales in the past three months compared to the prior three months, down 5 points but still one of the strongest readings in years. Reports of sales increases were most frequent in manufacturing and the wholesale trades. The net percent of owners expecting higher real sales volumes fell 5 points to a net 26 percent of owners, reversing half of the 10 point rise in May. Retailers and firms in financial services were especially optimistic about future sales prospects, the basis for their strong hiring and inventory investment plans.

The net percent of owners reporting inventory increases fell 6 points to a net negative 2 percent (seasonally adjusted), ending a five month positive run for reports of increases. The net percent of owners viewing current inventory stocks as “too low” (a positive number means more think stocks are too low than too high, a positive for inventory building) gained 4 points to a net 0 percent, a very positive move. This confirms that the stock reductions reported were indeed a result of strong sales, not a result of less certainty. The net percent of owners planning to build inventories rose 2 points to a net 6 percent.

COMPENSATION AND EARNINGS

Reports of higher worker compensation slipped 4 points from May's record reading to a net 31 percent of all firms. Plans to raise compensation rose 1 point to a net 21 percent, high but below its recent peak of 24 percent in January. Owners complain at record rates about labor quality issues, with 87 percent of those hiring or trying to hire in June reporting few or no qualified applicants for their open positions. The frequency of reports of positive profit trends fell from its record high in May, losing 4 percentage points to a net negative 1 percent reporting quarter on quarter profit improvements, still one of the best readings in the survey's 45 year history.

CREDIT MARKETS

Three percent of owners reported that all their borrowing needs were not satisfied, down 1 point and historically low. Thirty percent reported all credit needs met (down 7 points) and 54 percent said they were not interested in a loan, up 11 points. These are extreme movements, and the July figures are likely to be an average of May and June. Only 2 percent reported that financing was their top business problem compared to 21 percent the availability of qualified labor, 16 percent citing taxes, and 14 percent citing regulations and red tape. Two percent reported loans “harder to get,” historically about as low as the measure can go. Twenty-eight percent of all owners reported borrowing on a regular basis (down 6 points). The average rate paid on short maturity loans fell 30 basis points to 6.1 percent.

INFLATION

The net percent of owners raising average selling prices fell 5 points to a net 14 percent seasonally adjusted. Unadjusted, 9 percent of owners reported reducing their average selling prices in the past three months (up 3 points), and 25 percent reported price increases (down 3 points). Inflation does not appear to be a threat in the current environment. Seasonally adjusted, a net 24 percent plan price hikes (down 2 points).

COMMENTARY

GDP growth in the first quarter was disappointing, as have been first quarter reports for several years now. Lacking a better explanation, the chatter is that there is a seasonal adjustment problem. The second quarter looks like it will come in at a much better pace (the New York Federal Reserve anticipates 2.8 percent, the Atlanta Federal Reserve 3.8 percent). Certainly economic activity on Main Street is supportive of a much better GDP growth reading. Small business owners are pushing ahead with an expansive agenda, trying to figure out how to produce more with a restricted supply of labor. Unemployment is about as low as it can go. Mortgage rates and inflation are both still historically low, and incomes are rising.

Main Street is getting the good news first hand – higher sales, more profits, opportunities to expand and grow. They see at street level the successes being achieved in the economy that news programs don't cover nearly enough. Record numbers see the current period as a good time to expand operations and are trying to hire more workers. Capital spending is at levels not seen in a decade. Regulatory burdens are being reduced. Small business owners are focusing on what really matters and moving the economy forward. Economic growth will be solid through the end of the year on Main Street.

SMALL BUSINESS SURVEY QUESTIONS	PAGE IN REPORT
Do you think the next three months will be a good time for small business to expand substantially? Why?	4
About the economy in general, do you think that six months from now general business conditions will be better than they are now, about the same, or worse?	5
Were your net earnings or “income” (after taxes) from your business during the last calendar quarter higher, lower, or about the same as they were for the quarter before?	6
If higher or lower, what is the most important reason?	6
During the last calendar quarter, was your dollar sales volume higher, lower, or about the same as it was for the quarter before?	7
Overall, what do you expect to happen to real volume (number of units) of goods and/or services that you will sell during the next three months?	7
How are your average selling prices compared to three months ago?	8
In the next three months, do you plan to change the average selling prices of your goods and/or services?	8
During the last three months, did the total number of employees in your firm increase, decrease, or stay about the same?	9
If you have filled or attempted to fill any job openings in the past three months, how many qualified applicants were there for the position(s)?	9
Do you have any job openings that you are not able to fill right now?	10
In the next three months, do you expect to increase or decrease the total number of people working for you?	10
Over the past three months, did you change the average employee compensation?	11
Do you plan to change average employee compensation during the next three months?	11

SMALL BUSINESS SURVEY QUESTIONS	PAGE IN REPORT
Are...loans easier or harder to get than they were three months ago?	12
During the last three months, was your firm able to satisfy its borrowing needs?	13
Do you expect to find it easier or harder to obtain your required financing during the next three months?	13
If you borrow money regularly (at least once every three months) as part of your business activity, how does the rate of interest payable on your most recent loan compare with that paid three months ago?	14
If you borrowed within the last three months for business purposes, and the loan maturity (pay back period) was 1 year or less, what interest rate did you pay?	14
During the last three months, did you increase or decrease your inventories?	15
At the present time, do you feel your inventories are too large, about right, or inadequate?	15
Looking ahead to the next three months to six months, do you expect, on balance, to add to your inventories, keep them about the same, or decrease them?	15
During the last six months, has your firm made any capital expenditures to improve or purchase equipment, buildings, or land?	16
If [your firm made any capital expenditures], what was the total cost of all these projects?	17
Looking ahead to the next three to six months, do you expect to make any capital expenditures for plant and/or physical equipment?	17
What is the single most important problem facing your business today?	18
Please classify your major business activity, using one of the categories of example below	19
How many employees do you have full and part-time, including yourself?	19
