CyberStrong™ for DFARS

Comply to DFARS & NIST SP 800-171

Benefits

- Improve visibility: Measure, analyze and report DFARS compliance from a single pane of glass.

- Implement NIST SP 800-171: CyberStrong will define a path and steps to implement controls.

- Provide measurement: CyberStrong scores your posture in an intuitive, easy to understand way.

- Improve communication: Unlock and empower internal resources with a shared plan of action.

- Information sharing: Generate simple reports for executive teams, boards of directors, auditors, and external constituents.

- Provide reports: Standardize and automate routine customer and partner requests for DFARS contract compliance data.

- Improve cyber resiliency: Be proactive, not reactive. Rapidly identify, respond, and mitigate risks to CUI.

- Save time and money: Optimize your cyber program and return on investment with our Cognitive / AI recommendations.

Defense contractors working for the United States Department of Defense (DoD) must comply with the Defense Federal Acquisition Regulation Supplement (DFARS) by December 31, 2017. DFARS requires defense contractors to implement the cybersecurity controls contained in NIST SP 800-171 to protect Controlled Unclassified Information (CUI). This is a major requirement and resource challenge for many contractors.

Meeting DFARS can be difficult, complex, and time consuming. Our offer provides a proven methodology, measurement system and platform. The CyberStrong platform provides the needed features to quickly streamline your DFARS project and rapidly accelerate NIST SP 800-171 adoption.

We simplify the implementation of NIST SP 800-171, making it easy to reach DFARS compliance. With CyberStrong, DFARS compliance can be attained without detailed knowledge of NIST SP 800-171 and its myriad of specified controls. CyberSaint Security was created specifically to enable organizational adoption of NIST cybersecurity frameworks and standards. This is our top priority and mission.

CyberStrong quickly establishes your organization's DFARS baseline. Leveraging artificial intelligence, the platform prioritizes gap remediation based on lowest cost and shortest path to compliance.

CyberStrong measures your overall DFARS compliance score, tracks progress and produces comprehensive visual reports. This capability allows you to easily report status to management and auditors alike. CyberStrong continuously measures progress toward compliance.

Get a free, no obligation quote today and become DFARS compliant before the December 2017 mandate. Email us: info@cybersaint.io

"The Contractor shall implement NIST SP 800-171, as soon as practical, but not later than December 31, 2017."
DFARS Section 252.204-7012 Safeguarding Covered Defense Information and Cyber Incident Reporting.
