

### **Understanding the “c” in Sage 100c**

The “c” in Sage 100c stands for “Customer Connected,” and it means big changes to modernize the Sage we’ve all come to know and love. For those unfamiliar with Sage 100c, it’s the enhanced, non-cloud based Sage 100 you know, but it runs on a subscription-based pricing plan. You’ll have the confidence to leverage new technology at your own pace, without disrupting your business.

Sage has been working hard to make the newest version of Sage 100 and Sage100c easier to use, with improved functionality and enhancements.

### **Some of the features specific to Sage100c v2018 are:**

- Spellcheck!
- The Bar Code module, renamed to ‘Mobility for Bar Code,’ has new features and additional integrations.
- You can now enter Physical Inventory counts and Sales Orders on a mobile device!
- Job Cost updated to Business Framework.
- A Toolbar Mode button has been added to the Desktop. This minimizes the Desktop, leaving the tab labels for the ribbon and status bar.
- A Web Content tab has been added to the ribbon.
- SAP Crystal Reports 2016 is now bundled with Sage v2018c.
- Service Notifications have been added for Sage services, such as Payroll.
- Warehouse Status fields (Active, Inactive, Restricted) have been added in Warehouse Code Maintenance.
- Paperless Office has been updated as part of the redesign of the Payroll Module.
- Visual Integrator has been modified to better manage job access.

### **In addition, some general overall functional improvements to 100c are:**

- Stay compliant with new Affordable Care Act requirements.
- Simplify everyday tasks with new user preference settings, and customizable themes.
- Save time with improved Accounts Payable reporting and printing options.
- Additional functionality in Accounts Receivable with customer memos.
- Automate sales order expiration dates.
- Resize and anchor controls in a custom Office environment for better data entry.
- Reorganize and simplify tasks with a modernized version of Sage Fixed Assets.
- Apply, activate, and manage credit payments with the Sage Payment Center.
- Improves access to the “new and improved” Business Insights Dashboard.
- Multi-bin warehousing.
