

Denbow designs and installs complete Erosion & Sediment Control, Slope Stabilization, Land Reclamation and Stormwater Management packages. Superior design using compost-based products means erosion is virtually eliminated and sediment remains onsite where it belongs while minimizing maintenance and removal costs. Our advanced installation technology ensures the project is completed with minimal impact to the worksite and surrounding areas.

Denbow's compost-based Erosion & Sediment Control products are ESC bylaw approved alternatives for:

EcoBlanket is an alternative for:

- coconut fiber blanket / netting
- straw mulch / blanket
- jute netting / blanket
- curled wood fiber blanket
- wood fiber blanket
- plastic netting / mesh
- synthetic fiber with netting
- bonded synthetic fiber

When Terraseeded™, EcoBlanket replaces:

- hydroseeding
- hydroseeding with straw mulch cover
- bonded fiber matrix
- combined specification line items including final grade, soil application, seeding, mulch cover and tacking agent

Filtrex FilterSoxx or EcoBerm are alternatives for:

- silt fence
- waddles / fiber rolls
- ditch checks
- storm drain inserts
- straw bales
- bio bags
- other synthetic barriers
