

## GreenRoofs & Multi-Storey Gardens

A very popular, growing trend in urban development is green roofs and gardens/planters on above grade levels. They are beautiful and a good tool for stormwater management.

Getting soil, growing medium and rock can become a pain staking process. Consider this: Our blower truck install soil and aggregate onto multiple levels in one day. The only requirement is a reseverd parking space! Explore how we can increase your productivity with installation via blower truck.

### Our Promise

Our skilled team have become trusted to meet the challenges to install products above grade. We've blown soil up 16 stories high - and would welcome the opportunity to beat that!

Green roofs retain rainwater, and act as natural filters for any of the water that happens to run off the building.

## Rooftop and Multi-Storey Installations

### SkySoil™

**SkySoil™** - Denbow has developed an in-house premium green roof growing media -SkySoil™. Made from the highest quality ingredients, it is thoroughly tested and light weight. The sky is the limit with our green roof SkySoil™.

Greenroofs & rooftop gardens provide solutions to several urban environmental problems, including:

- **storm-water management**
- **reduction of building heat absorption**
- **reduction of pollution**
- **improved air quality**
- **decreased noise pollution**
- **creation of urban wildlife habitat**
- **creation of greenspace**

Want to get soil and aggregates above grade without using cranes or elevators? Contact us to inquire about our Express Blower installation services. Blower truck technology provides a safe, efficient and cost effective solution to placing materials where they are required.

Denbow has experience blowing rooftop garden soils as high as 16 floors! Our experienced team of operators install materials safely and professionally.
